Preface

This manual is applied to P1166 / P1266 / P1266i / P1166P / P1266P projection system. The manual gives you a brief description of basic technical information to help in service and maintain the product.

Your customers will appreciate the quick response time when you immediately identify problems that occur with our products. We expect your customers will appreciate the service that you offer them.

This manual is for technicians and people who have an electronic background. Please send the product back to the distributor for repairing and do not attempt to do anything that is complex or is not mentioned in the troubleshooting.

Note:

The information found in this manual is subject to change without prior notice. Any subsequent changes made to the data herein will be incorporated in future edition.

Introduction

1-1 Highlight

No	Item	Description
1	Dimensions (W x H x D)	● 269 x 205.6 x 95.5 mm
2	Weight	● 2.5 kg
3	Tilt Angle	● 7 degree with elevator mechanism
4	Power Supply	● Universal AC 100 – 240 V ~ 50-60 Hz with PFC input ● 180W for OSRAM E20.8 Lamp @ normal operation ● Variance FAN speed control (Depends on temperature variant)
5	Keystone correction	● +/ -40 degree (80 degree)
6	Cooling system	● Advanced Air Flow ● Two fans with system acoustic noise level ● Temperature control circuits with adaptive fan rotational speeds ● High altitude cooling mode ● Maximum touch temperature follow UL60950-1
7	Brightness	Engineering spec: ● For P1166 / P1266: • 2250 ANSI Lumens (Typical; Full power mode) • 2000 ANSI Lumens (Minimum; Full power mode) ● For P1266i / P1166P / P1266P : • 2475 ANSI Lumens (Typical; Full power mode) • 2200 ANSI Lumens (Minimum; Full power mode) Marketing spec: ● For P1166 / P1266: • 2500 ANSI Lumens ● For P1266i / P1166P / P1266P : • 2700 ANSI Lumens

No	Item	Description
8	Contrast	Engineering spec: ● For P1166 / P1266: • 1400: 1 Full White and Black (Minimum; Full power mode) • 1800: 1 Full White and Black (Typical; Full power mode) ● For P1266i / P1166P / P1266P : • 1900: 1 (Minimum; Full White with full power / full Black with eco power) • 2400: 1 (Typical; Full White with full power / full Black with eco power) Marketing spec: ● For P1166 / P1266: • 2000: 1 ● For P1266i / P1166P / P1266P : • 2500: 1
9	Uniformity	Engineering spec: ● 65% JBMA (Minimum; Full power mode) ● 80% JBMA (Typical; Full power mode) Marketing spec: ● 90%
10	Throw ratio	● 1.6 – 1.92: 1 distance/width @60”
11	Audio	● One 8-Ohm internal speaker ● Output Power: 2 Watts ● Input sensitivity 0.5Vrms
12	Projection lens	● F# 2.4 ~2.66, f = 18.2~21.8 mm, 1.2X Mechanical Zoom Lens
13	Lamp life	● 3000 hours, 50% survival rate (Full power Mode) ● 4000 hours, 50% survival rate (Eco power Mode)
14	System controller	● TI DDP2230
15	Terminal	● One HDMI Female Terminal ● One VGA input (One D-SUB) ● One D-Sub 15-Pin output ● One Mini DIN 3-Pin Connector for RS232 control input ● Video input (One RCA jack Type, One Mini DIN 4-pin S-video) ● Audio input (One Phone jack Type) ● One USB (One Type-B)
16	Lamp housing	● Lamp Assembly could be changed by customer himself, but should read the user manual for instruction in advance ● Lamp Assembly should be provided by Coretronic and distributed through authorized agencies

No	Item	Description
17	Input signal spec.	● Hsync Frequency 31.5 k ~ 100 kHz ● Vsync Frequency 50 ~ 85 Hz ● Video Signal RGB (PC) • Analog RGB 0.7Vp-p, 75 ohm, Separate TTL H,V Sync • Analog RGB 1Vp-p, 75 ohm, Sync. On Green signal • Analog RGB 0.7Vp-p, 75 ohm, Composite TTL Sync. ● Video • Composite video 1Vp-p,75 ohm • S-video Luminance 0.714Vp-p, 75 ohm • Chrominance 0.286Vp-p, 75 ohm • Component Video 1Vp-p, 75 ohm
18	TI DMD	● For P1166 / P1166P: • TI DMD 0.55” 12° 2xLVDS Type-X SVGA Digital Mirror Device ● For P1266 / P1266i / P1266P • TI DMD 0.55” 12° 2xLVDS Type-X XGA Digital Mirror Device
19	Number of active dots	● For P1166 / P1166P: • 800 (H) x 600 (V) ● For P1266 / P1266i / P1266P: • 1024 (H) x 768 (V)
20	Video compatibility	● Standards : • NTSC (3.58/4.43) • PAL (B/D/G/H/I/M/N) • SECAM (B/D/G/K/K1/L) • HDTV - 480p, 576p, 720p, 1080P
21	XGA / Compression	● Compression : by using “DDP2230” Chips can make image compression
22	Color wheel	● 6 segments ● 7200 rpm (2X) ● 9000rpm@3X PAL 50Hz ● 10800 rpm@3X NTSC 60Hz ● Segment Angle: R85Y37G90C28W42B78
23	Lamp	● For P1166 / P1266: • 180 – Watt OSRAM E20.8 Lamp (user replaceable) dimmable to 150 W ● For P1266i / P1166P / P1266P : • 200 – Watt OSRAM E20.8 Lamp (user replaceable) dimmable to 160W
24	Temperature	● Operating: 5°C ~ 35°C ● Storage: -20°C ~ 60°C

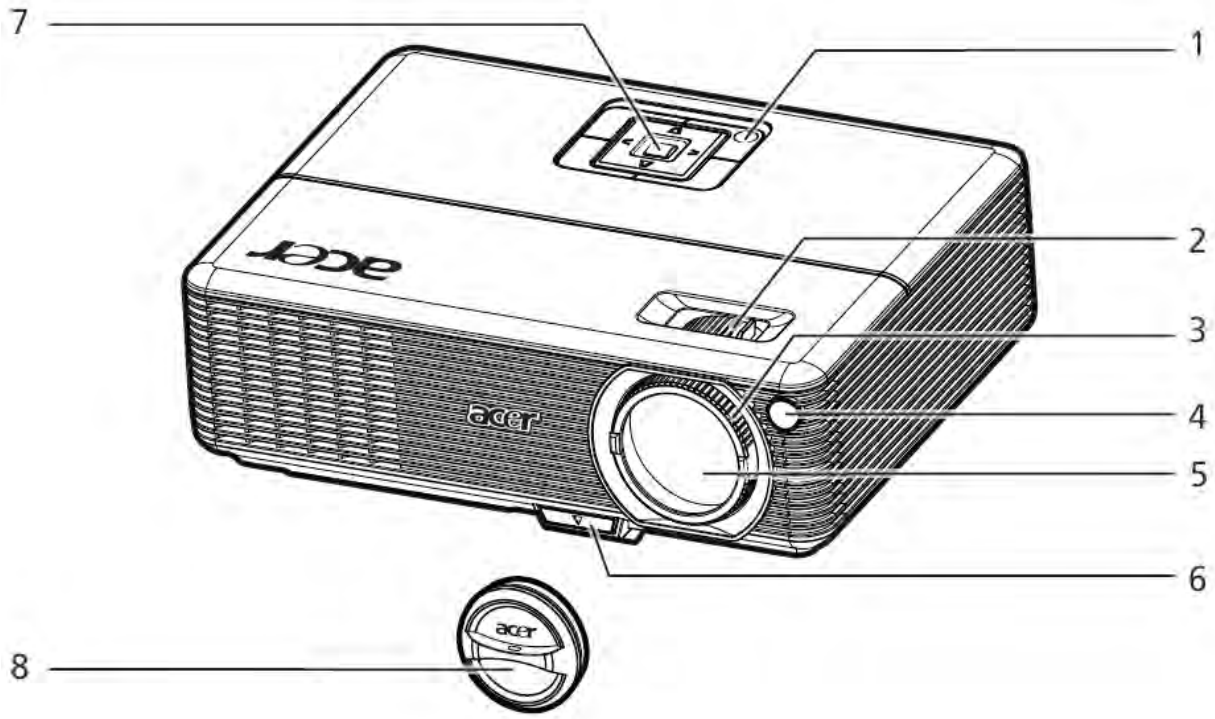
Product Overview

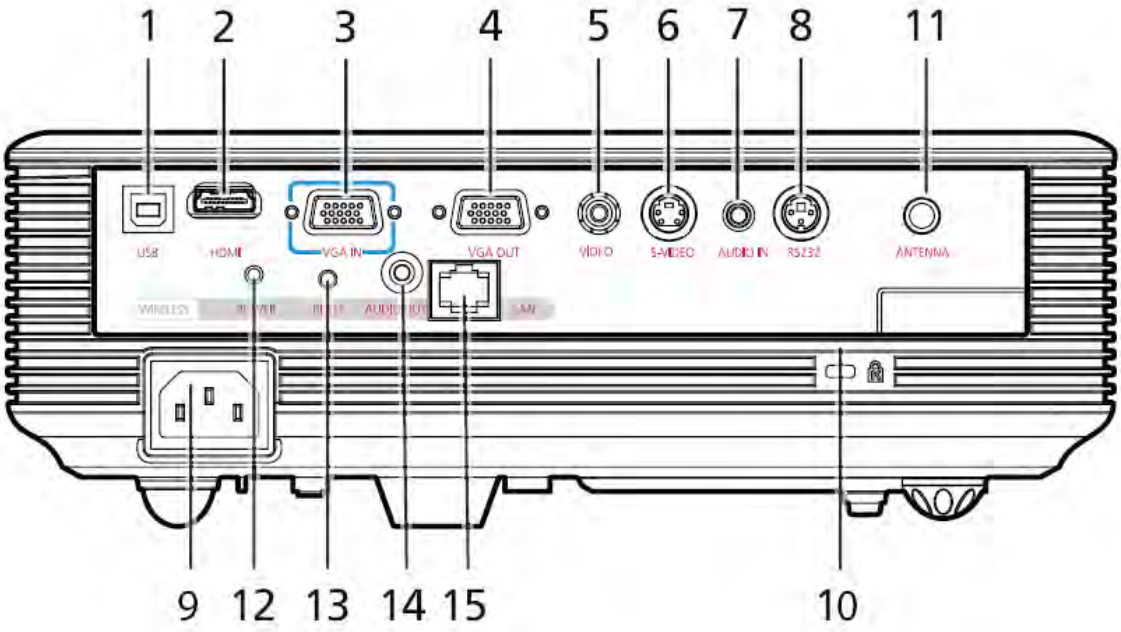
Projector Outlook

Front /Upper side



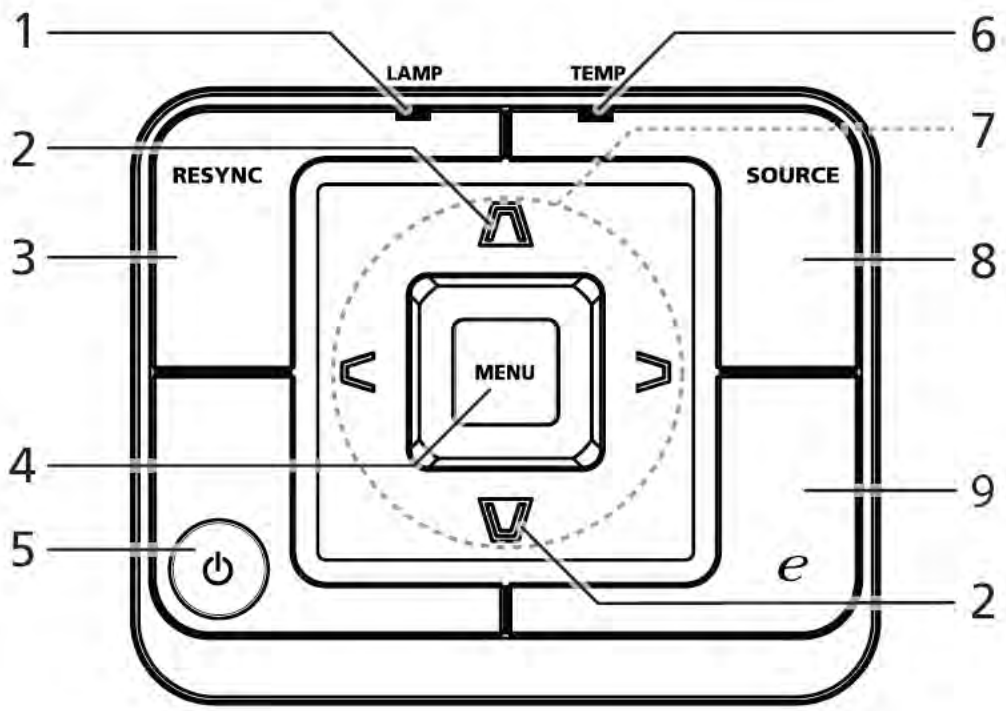
Item	Description	Item	Description
1	Power button	5	Zoom lens
2	Zoom ring	6	Elevator foot
3	Focus ring	7	Control panel
4	Remote control receiver	8	Lens cap

Rear side



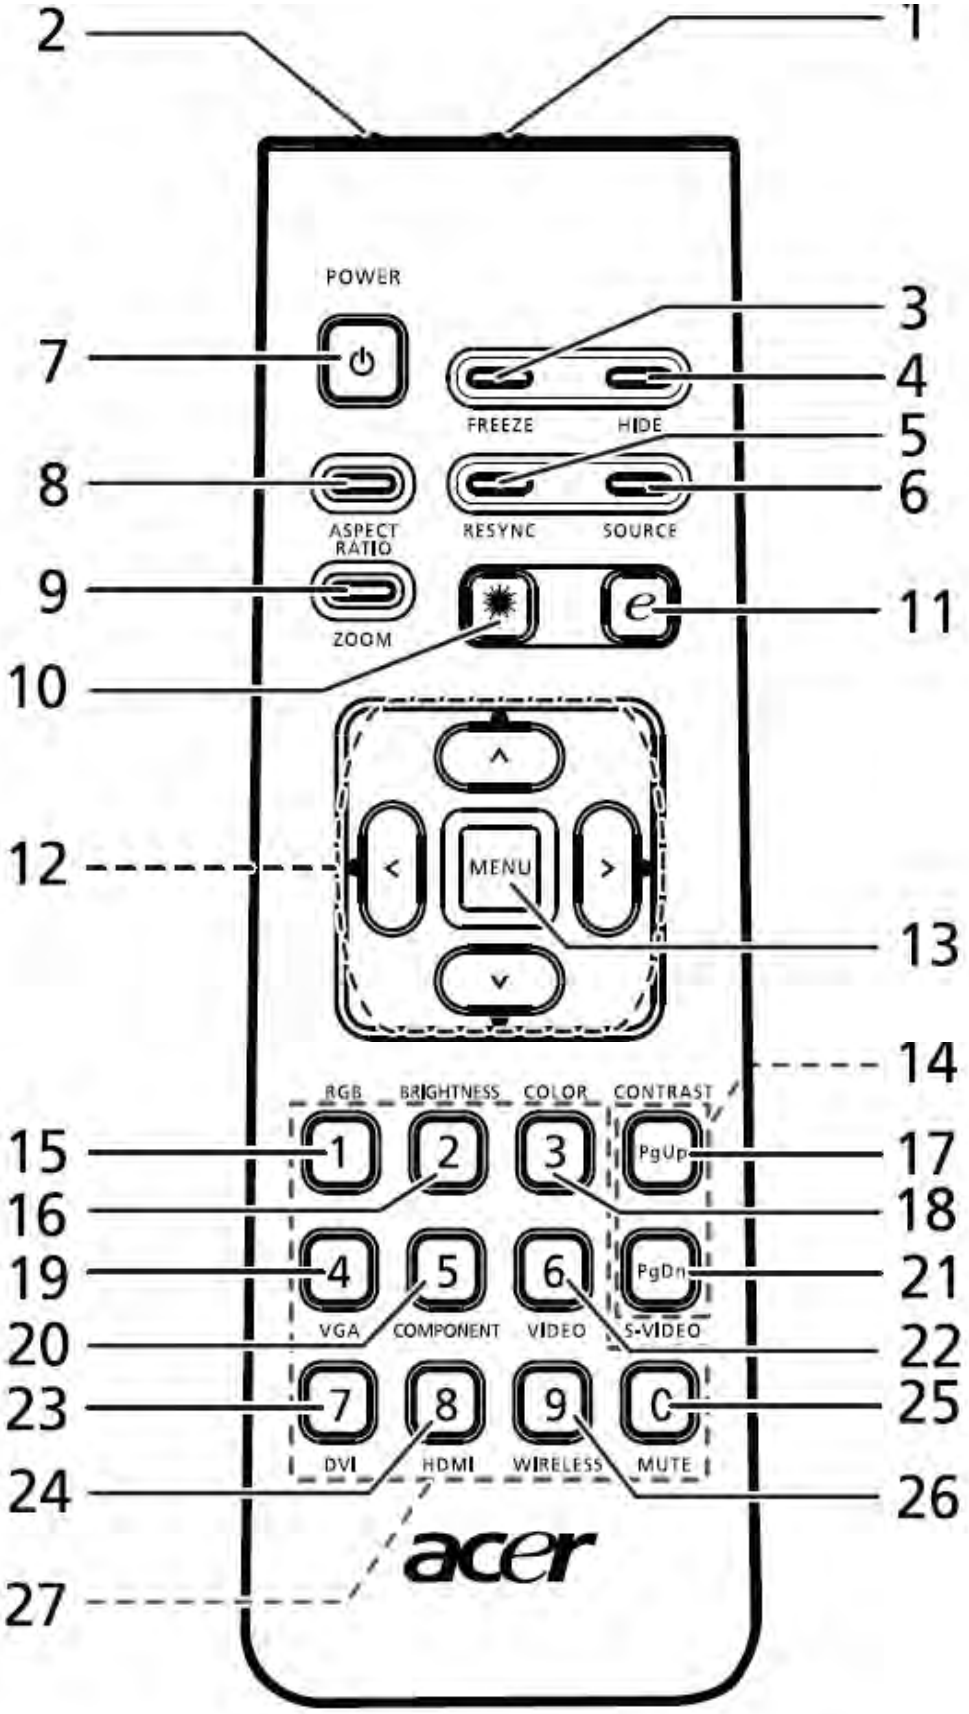
Item	Description	Item	Description
1	USB connector	9	Power socket
2	HDMI connector	10	Kensington™ lock port
3	PC analog signal/HDTV/component video input connector (VGA IN)	Below items are for P1266i series only:	
4	Monitor loop-through output connector (VGA-Out)	11	Antenna
5	Composite video input connector	12	Power LED for wireless
6	S-Video input connector	13	Reset button
7	Audio input connector	14	Audio output connector for wireless
8	RS232 connector	15	Lan (RJ45 Port for 10/100M Ethernet)

Control Panel



Item	Function	Description
1	LAMP	Lamp Indicator LED
2	KEYSTONE	Adjusts the image to compensate for distortion caused by tilting the projector.
3	RESYNC	Automatically synchronizes the projector to the input source.
4	MENU	• Press “MENU” to launch the Onscreen display (OSD) menu, back to the previous step for the OSD menu operation or exit the OSD menu. • Confirm your selection of items.
5	POWER	See the contents in “Turning the Projector On/ Off” section.
6	TEMP	Temp Indicator LED
7	FOUR DIRECTIONAL SELECT KEYS	Use to select items or make adjustments to your selection.
8	SOURCE	Press “SOURCE” to choose RGB, Component, SVideo, Composite, HDTV and HDMI™ sources.
9	EMPOWERING KEY	Unique Acer functions: eOpening, eView, eTimer,ePower Management.

Remote Control Layout

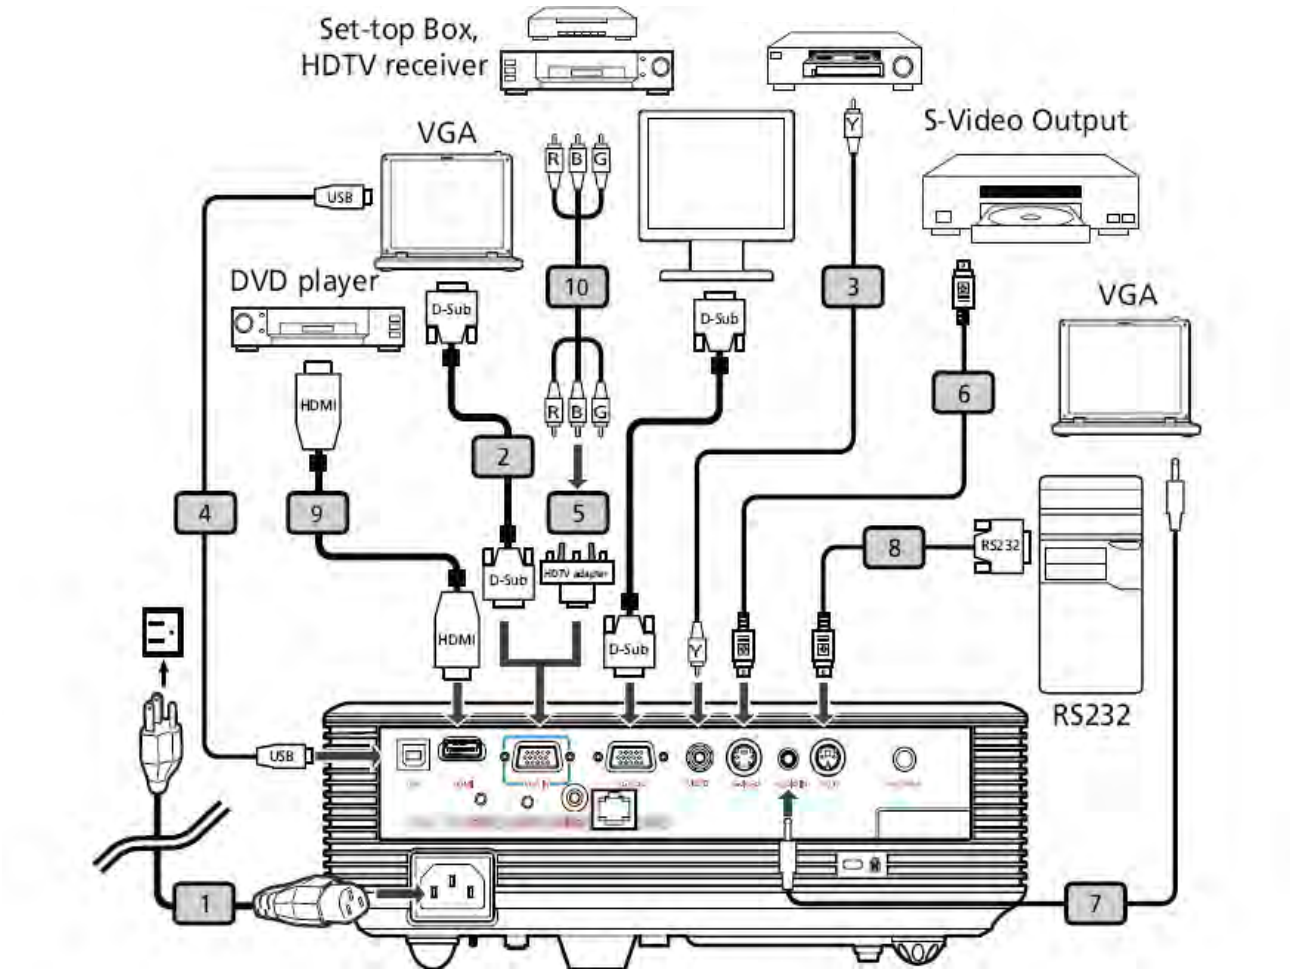


Item	Icon	Function	Description
1		INFRARED TRANSMITTER	Sends signals to the projector.
2 (#)		Laser pointer	Aim the remote at the viewing screen.
3		FREEZE	To pause the screen image.
4		HIDE	Momentarily turns off the video. Press “HIDE” to hide the image, press again to display the image.
5		RESYNC	Automatically synchronizes the projector to the input source.
6		SOURCE	Press “SOURCE” to choose from RGB, Compo-nent-p, Component-i, S-Video, Composite, Video and HDTV sources.
7		POWER	Refer to the “Turning the Projector On/Off” sec-tion.
8		ASPECT RATIO	To choose the desired aspect ratio (Auto/4:3/16:9)
9		ZOOM	Zooms the projector display in or out.
10(#)		LASTER BUTTON	Aim the remote at the viewing screen, press and hold this button to activate the laser pointer. This function is not supported in Japanese market.
11		EMPOWERING KEY	Unique Acer functions: eOpening, eView, eTimer, ePower Management.
12		KEYSTONE	Adjusts the image to compensate for distortion caused by tilting the projector (± 40 degrees).
12		FOUR DIRECTION-AL SELECT KEYS	Use up, down, left, right buttons to select items or make adjustments to your selection.
13		MENU	• Press “MENU” to launch the Onscreen display (OSD) menu, back to the previous step for the OSD menu operation or exit the OSD menu. • Confirm your selection of items.
14		PAGE	For computer mode only. Use this button to select the next or previous page. This function is only available when connected to a computer via a USB cable.
15		RGB	Press “RGB” for true-color optimization.
16		BRIGHTNESS	Press “BRIGHTNESS” to adjust the brightness of the image.
17		CONTRAST	Use the “CONTRAST” option to control the differ-ence between the lightest and darkest parts of the picture.

Item	Icon	Function	Description
18		COLOR	Press “COLOR” to adjust the color temperature of image.
19		VGA	Press “VGA” to change source to the VGA connector. This connector supports analog RGB, YPbPr (480p/576p/720p/ 1080i), YCbCr (480i/576i) and RGBsync.
20		COMPONENT	Press “COMPONENT” to change source to Component video.This connection supports YPbPr (480p/576p/720p/1080i) and YCbCr (480i/576i).
21		S-VIDEO	To change source to S-Video.
22		VIDEO	To change source to COMPOSITE VIDEO.
23		DVI	No function.
24		HDMI™	To change source to HDMI™. (for the model if with HDMI™ connector)
25		MUTE	To turn on/off the volume.
26		WIRELESS	Press “WIRELESS” to display the image which is wirelessly transmitted from the PC to the projector via the “Acer eProjection Management” utility. (for wireless model)
27		KeyPad 0~9	Press “0~9” to input a password in the “Security”.

Note: "" Only for P1266i series, "#" Japan area is not supported.*

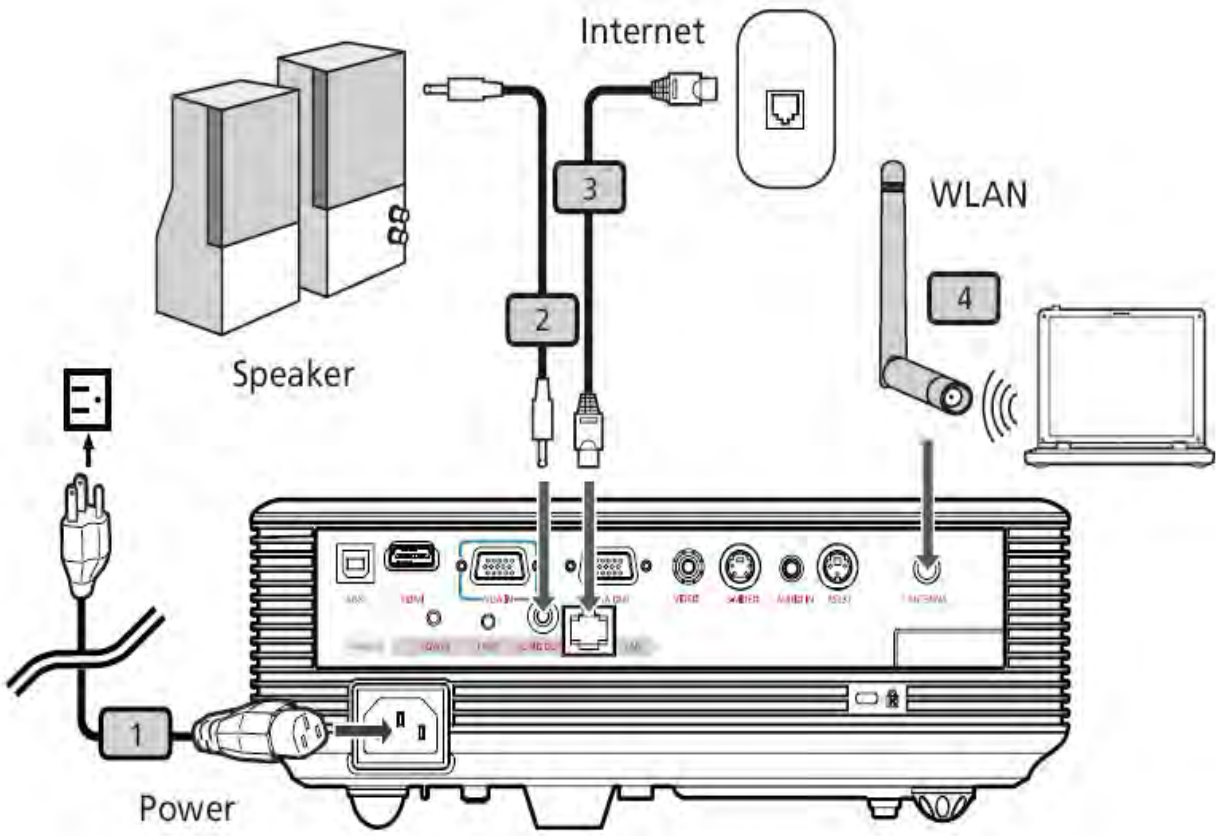
Connecting the Projector



Item	Description	Item	Description
1	Power cord	6	S-Video cable
2	VGA cable	7	Audio cable jack/jack
3	Composite video cable	8	RS232 cable
4	USB cable	9	HDMI cable
5	VGA to component/HDTV adapter	10	3 RCA component cable

Note: To ensure the projector works well with your computer,please make sure the timing of the display mode is compatible with the projector.

Connecting the Projector for Wireless Function



Item	Description
1	Power cord
2	Audio cable jack
3	Lan cable
4	Antenna

Note: For P1266i only

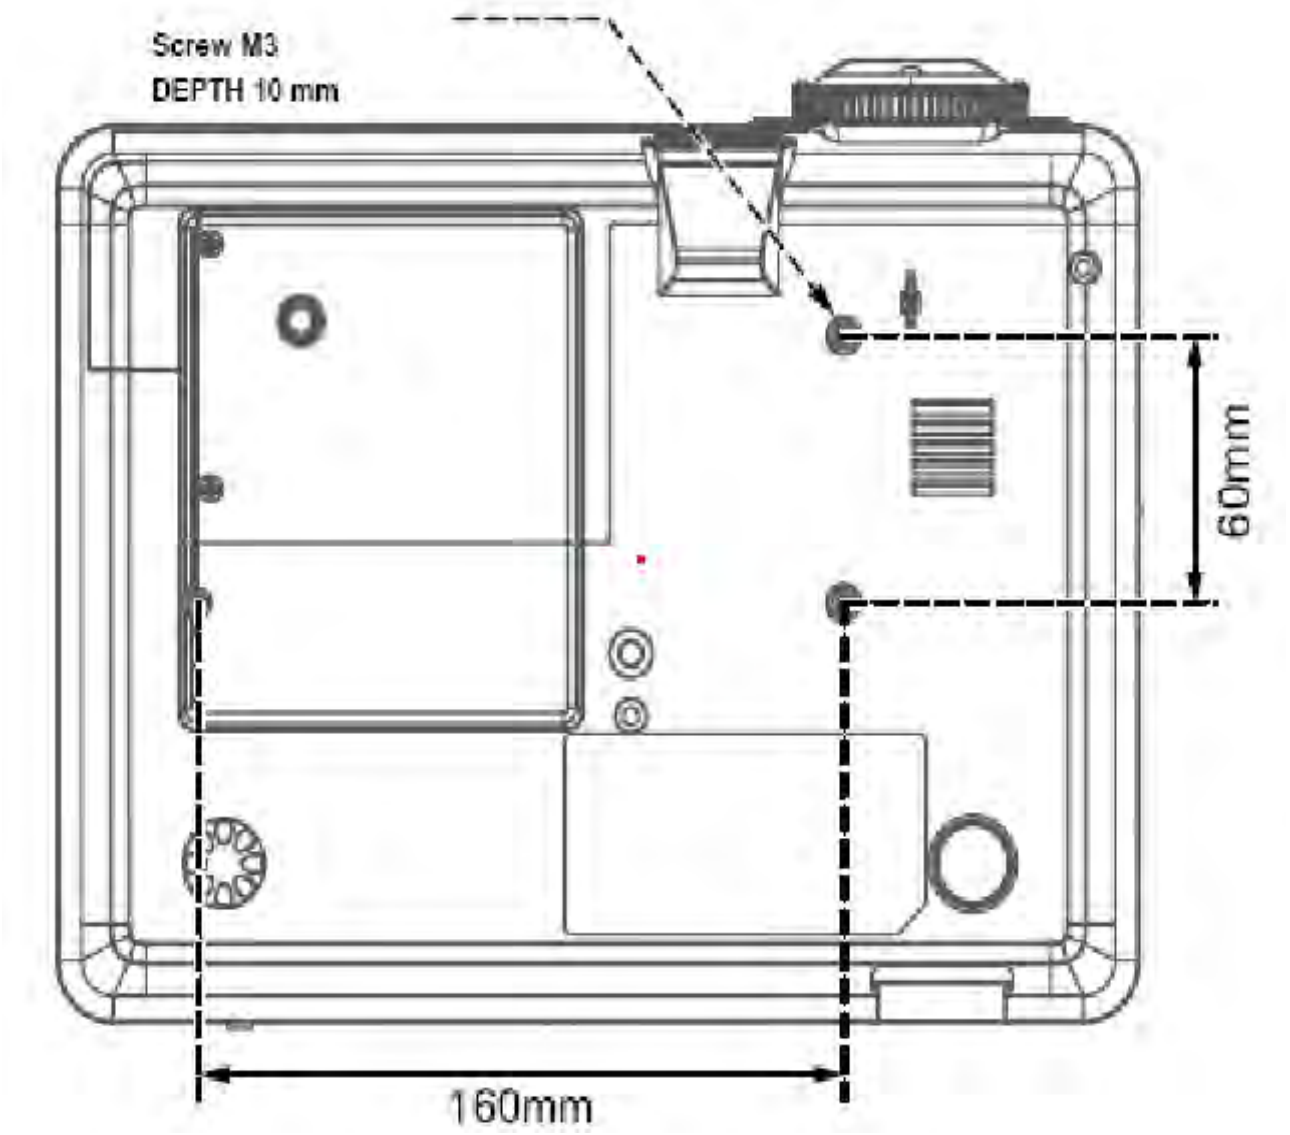
Bottom Cover Dimension



Chapter 2

Disassembly& Assembly Process

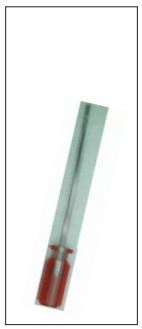
2-1 Equipment Needed & Product Overview

1. Screw Bit (+) :107
2. Hex Sleeves 5mm
3. Hex Sleeves 8mm
4. Tweezers
5. Long Nose Nipper, Angle Cutting Nipper
6. Sider Cutter Pliers
7. Projector

** Before you start: This process is protective level II. Operators should wear electrostatic chains.*

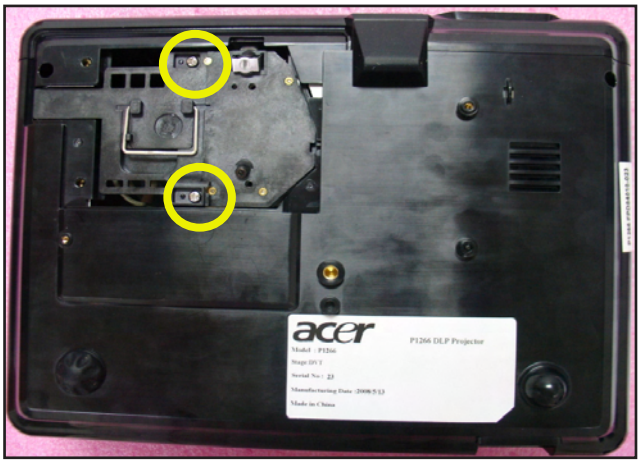
** Note: - If you need to replace the main board, you have to get into service mode and record the lamp usage hour. please refer to section 2-22.*

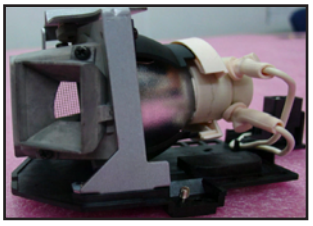
- The disassembly and assembly process for P1166 / P1266 / P1266i / P1166P / P1266P *is the same . Here we take P1266 as an example.*



2-2 Disassemble Lamp Cover Module and Lamp Module

1. Unscrew 2 screws (as red circle) to disassemble Lamp Cover Module.
2. Unscrew 2 screws (as yellow circle) to disassemble Lamp Module.





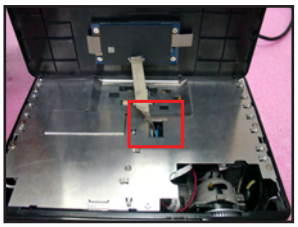
Lamp Module

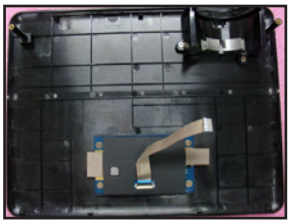
2-3 Disassemble Top Cover Module

1. Unscrew 2 screws (as red circle) on Back Cover.
2. Turn the projector to backside. Unplug 1 connector (as red square)

Note: - Pull up the Top Cover slowly to protect the connector from damage.

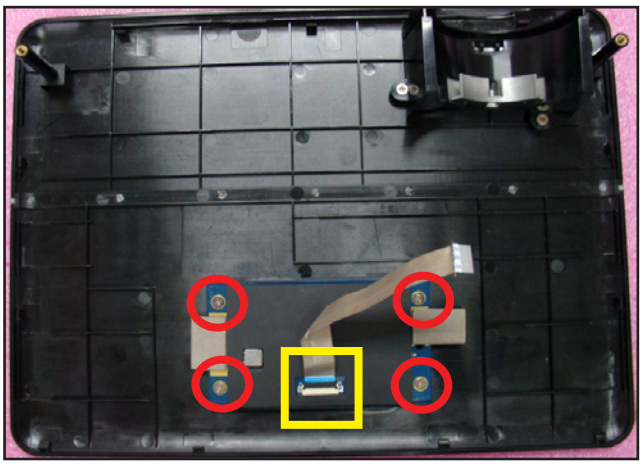
3. Disassembled Top Cover Module.

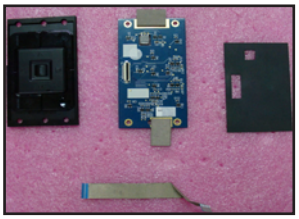




2-4 Disassemble Keypad Module

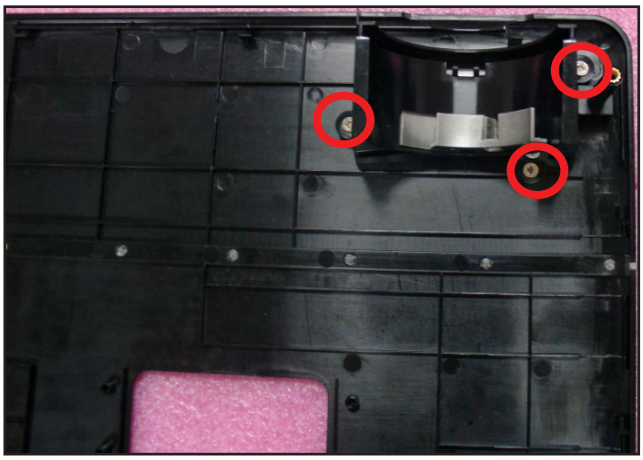
1. Unscrew 4 screws (as red circle).
2. Unplug 1 connector (as yellow square).
3. Disassemble all components of the Keypad Module.

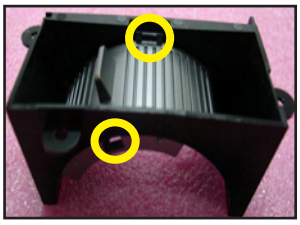


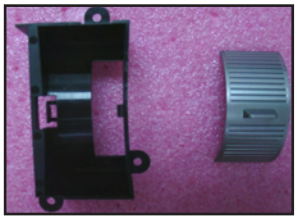


2-5 Disassemble Zoom Ring

1. Unscrew 3 screws (as red circle).
2. Use a tweezer to remove 2 tenons (as yellow circle) and then take off Zoom Ring.

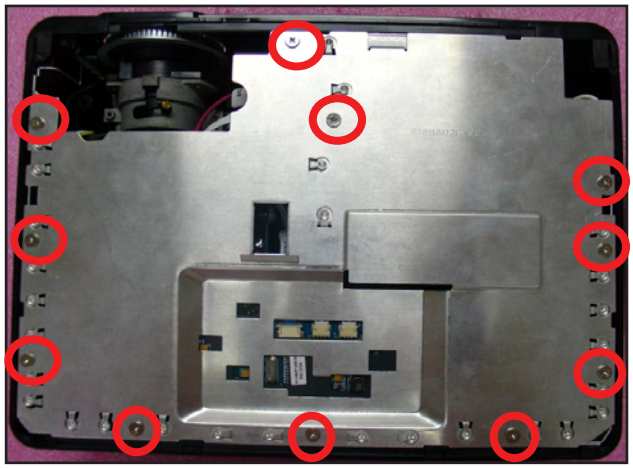


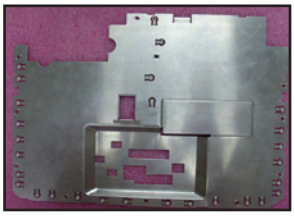




2-6 Disassemble Top Shielding

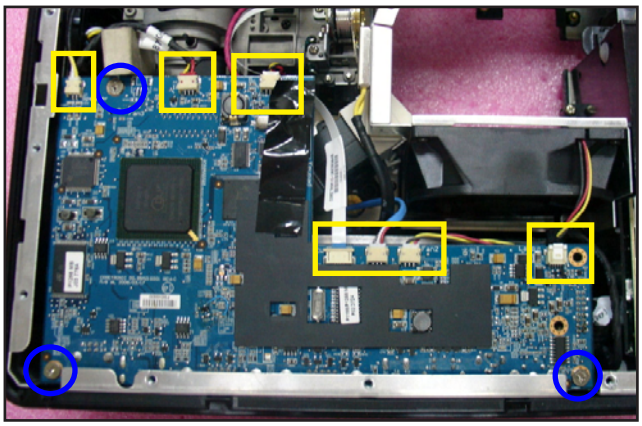
1. Unscrew 11 screws (as red circle).
2. Disassemble Top Shielding.





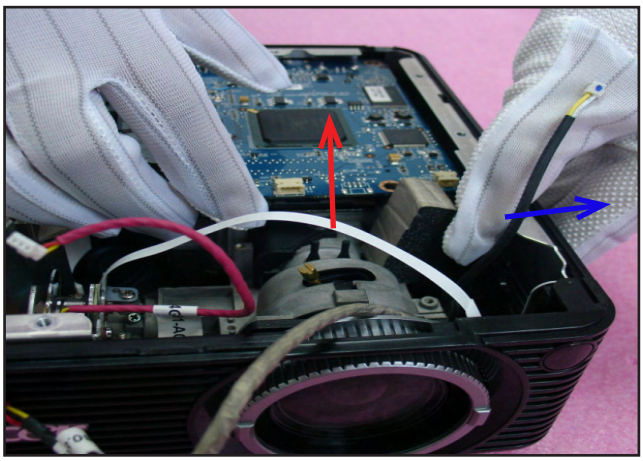
2-7 Disassemble Main Board Module

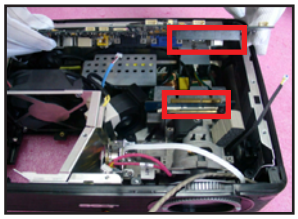
1. Unscrew 4 hex screws (as red circle).
2. Unscrew 3 screws (as blue circle).
3. Unplug 7 connectors (as yellow square).



4. Press Bottom Support shielding as blue arrow directs, push Main Board Module as red arrow directs.

Note: - When pulling up the Main Board, please handle it carefully to avoid damaging the connector that connects the DMD Board (as red square).



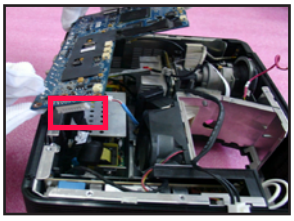


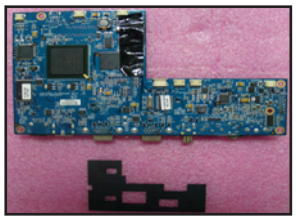
5. Unplug 1 connector (as red square).

Note: The connector is under Main Board.

6. Disassemble Main Board Module.

7. Tear Mylar off the Main Board.

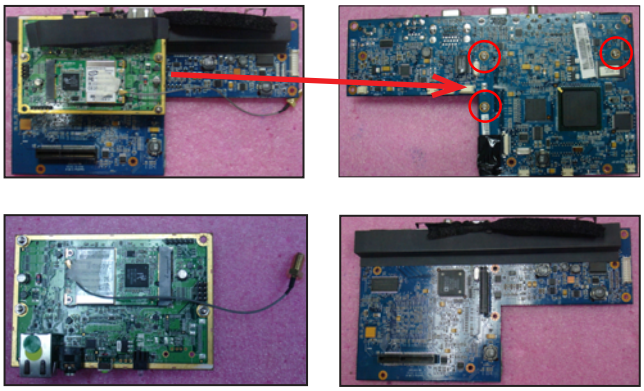




2-8 Disassemble Wireless Module (only for P1266i)

1. Turn back the Main Board.

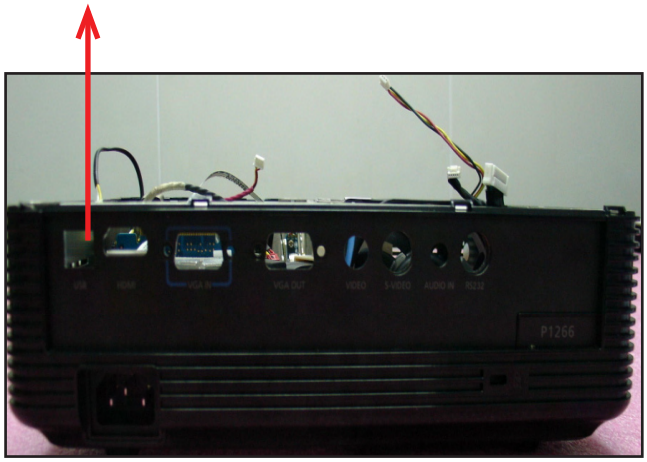
2. Unscrew 3 screws (as red circle) to disassemble Wireless Module.



Wireless Module

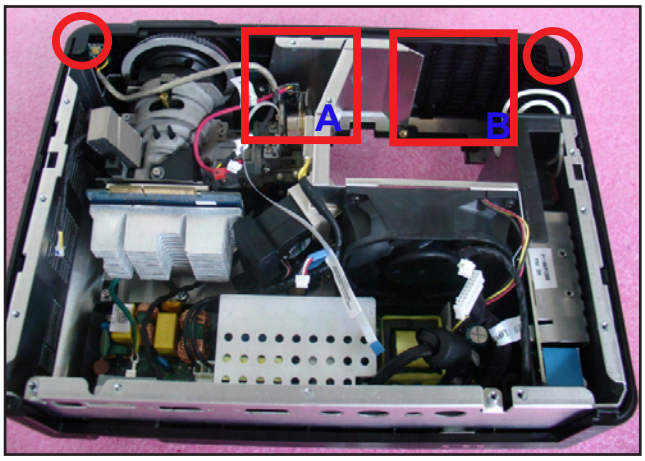
2-9 Disassemble Back Cover

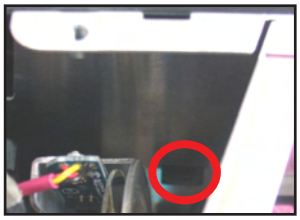
1. Pull up Back Cover in the direction of the red arrow.



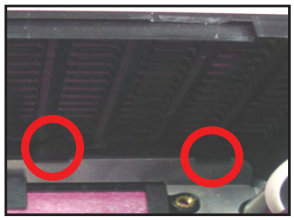
2-10 Disassemble Front Cover Module

1. Press 5 tenons (as red circle) to disassemble Front Cover.



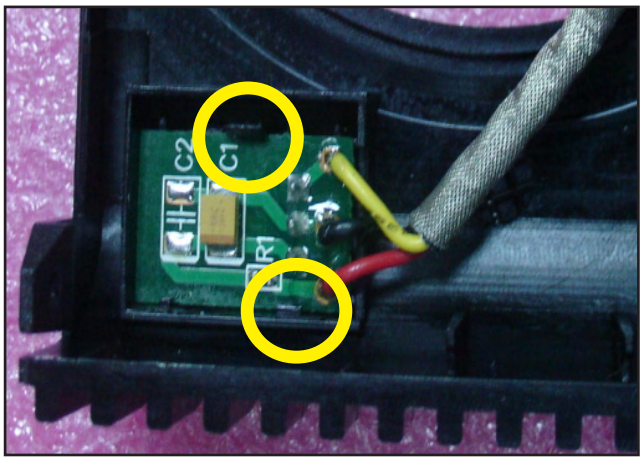


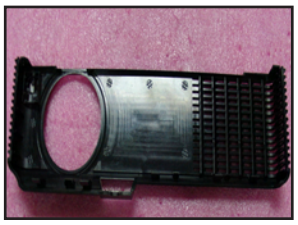
A

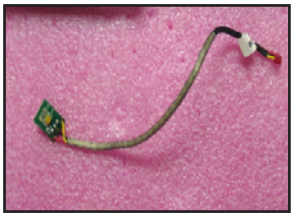


B

2. Press 2 tenons (as yellow circle) to disassemble IR sensor.

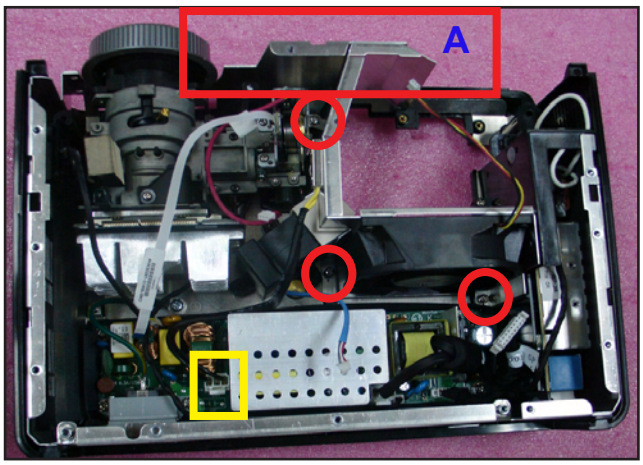


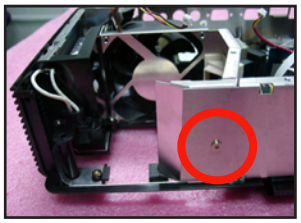




2-11 Disassemble Fan Module

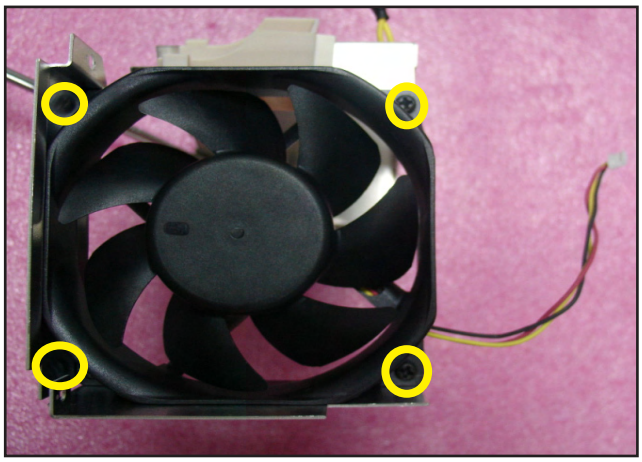
1. Unscrew 4 screws (as red circle) to disassemble Fan Module.
2. Unplug 1 connector (as yellow square) to disassemble Fan.

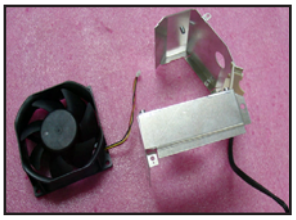




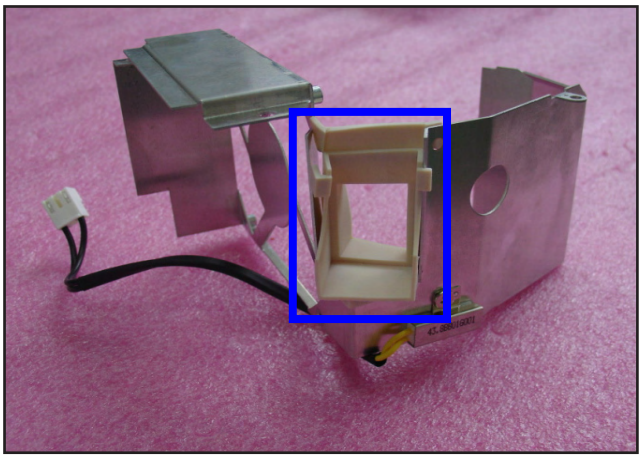
A

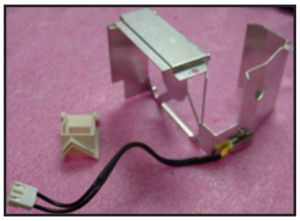
3. Unscrew 4 screws (as yellow circle) to disassemble Fan&Bracket.



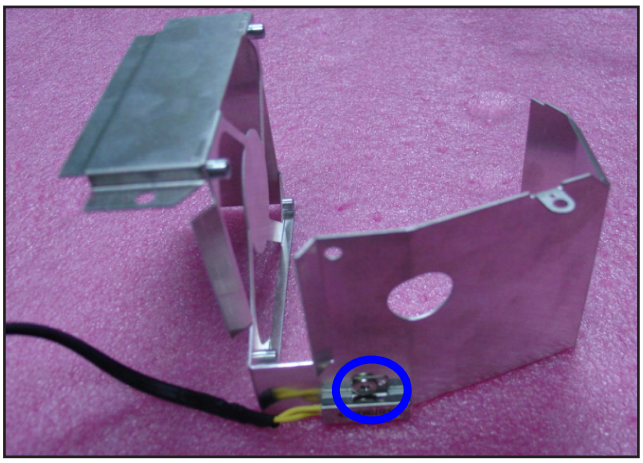


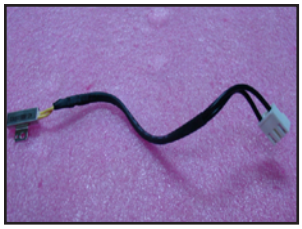
4. Take off Lamp Blower Rubber (as blue square).





5. Unscrew 1 screw (as blue circle) to disassemble Thermal Switch.

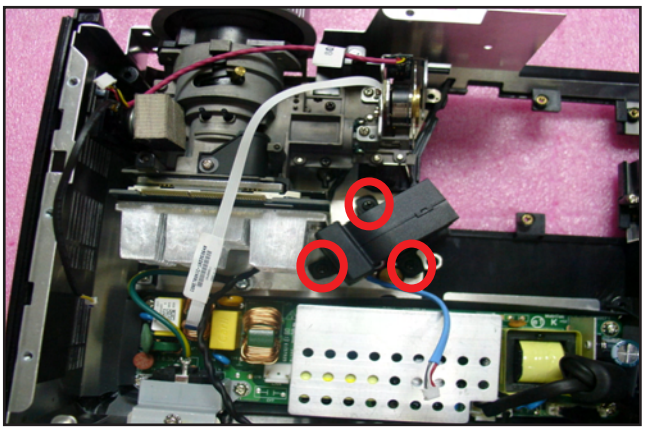


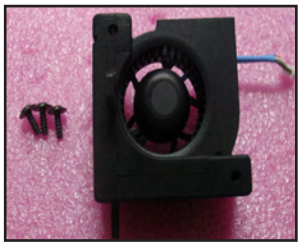


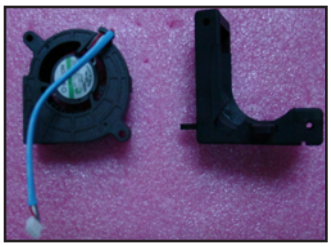
Thermal Switch

2-12 Disassemble Blower Module

1. Unscrew 3 screws (as red circle) to disassemble Blower Module.
2. Disassemble Blower and Blower Bracket.

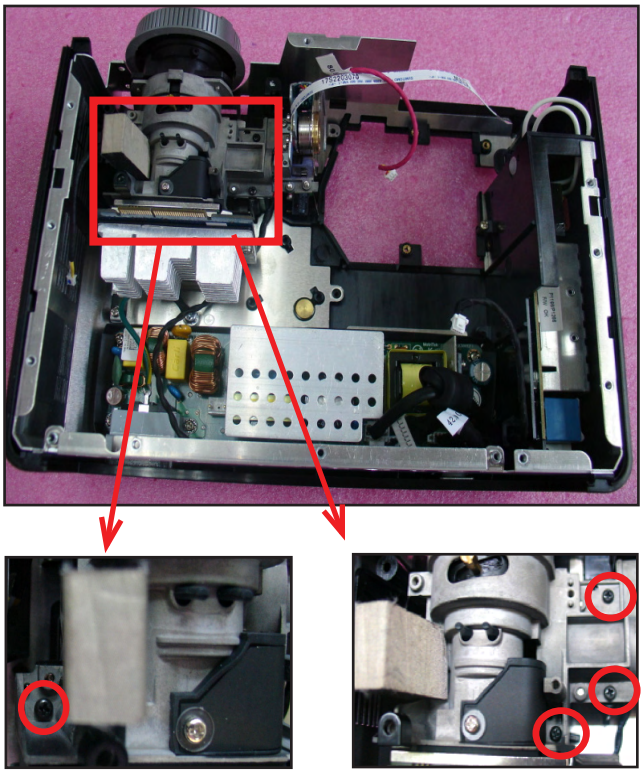




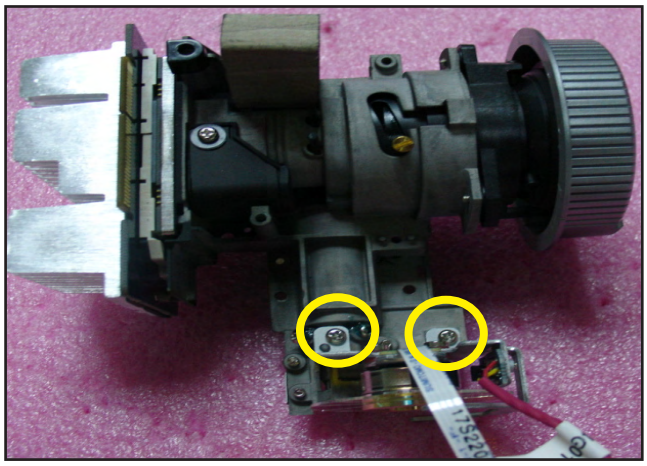


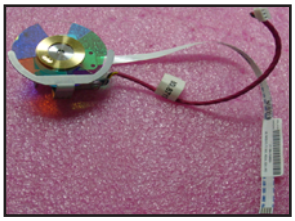
2-13 Disassemble Engine Module, Color Wheel Module and Rod Module

1. Unscrew 4 screws (as red circle) to disassemble Engine Module.

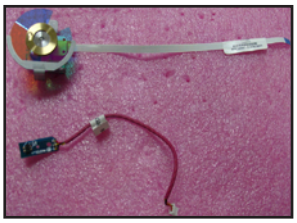


2. Unscrew 2 screws (as yellow circle) to disassemble Color Wheel Module.



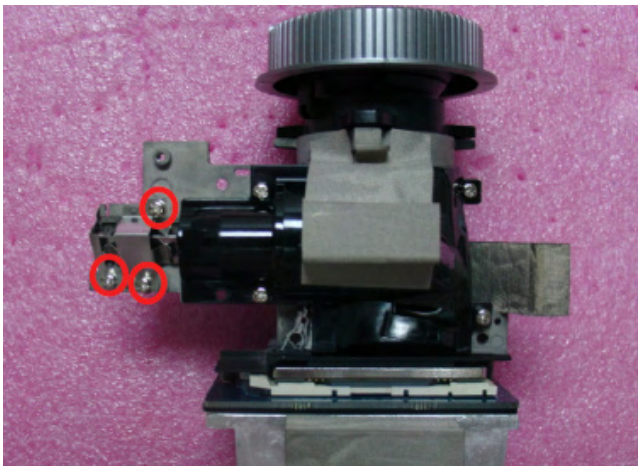


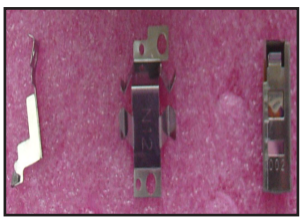
3. Unscrew 1 screw (as green circle) to disassemble Photo Sensor from Color Wheel Module.

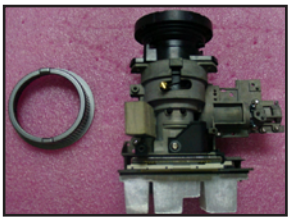


4. Unscrew 3 screws (as red circle).
5. Disassemble ROD Fix Plate and ROD Module.
6. Disassemble Focus Ring.

Note: - *Pay attention to the three tenons when disassembling focus ring.*

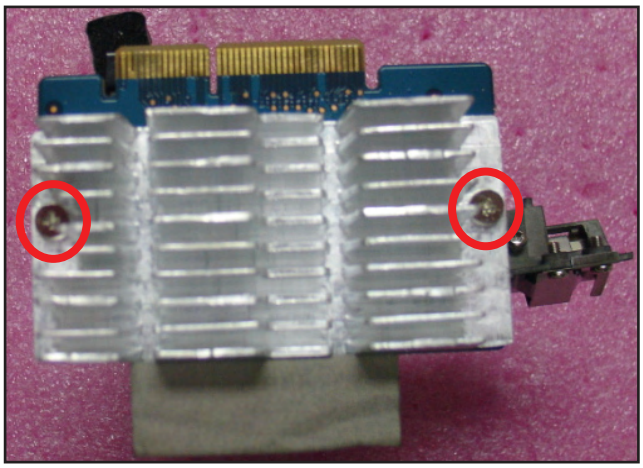


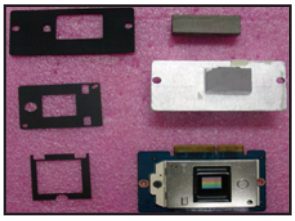




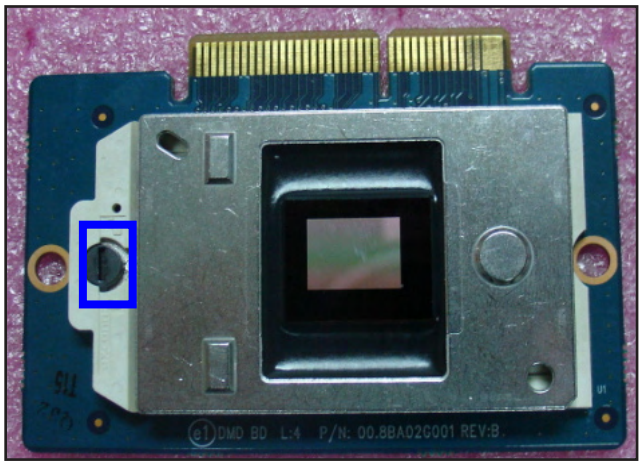
2-14 Disassemble DMD Board and DMD Chip Module

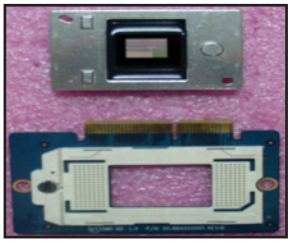
1. Unscrew 2 hex screws (as red circle).
2. Disassemble DMD Board and DMD Chip Module.



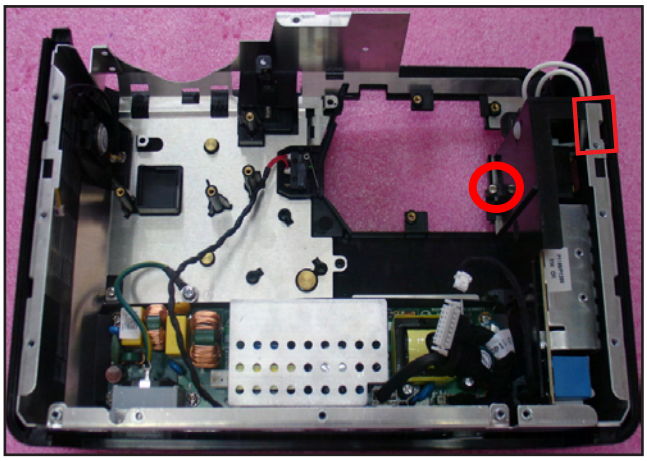


3. Rotate the switch(as blue square) and then take off DMD Chip.



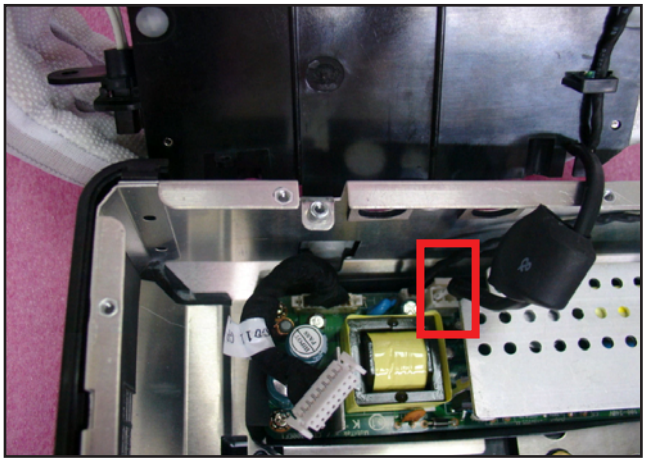


2-15 Disassemble Lamp Driver Module



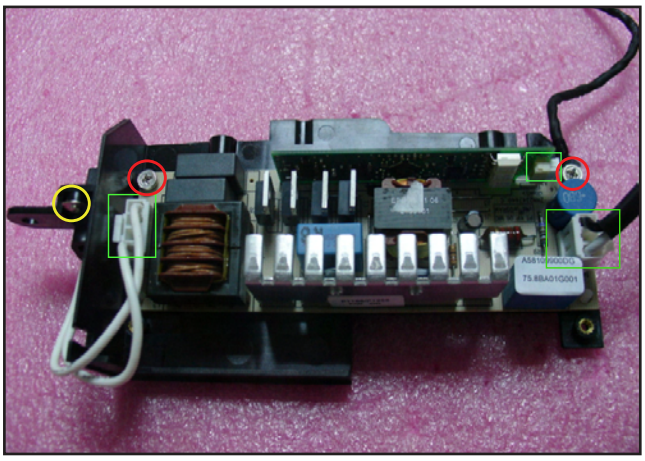
1. Unscrew 1 screw (as red circle) to disassemble Lamp Driver Module.

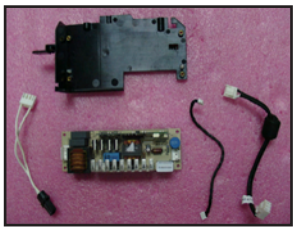
Note: - Pull up lamp driver module from the bottom support shielding (as red square).



2. Pull up 1 connector (as red square) to disassemble Lamp Driver Module.

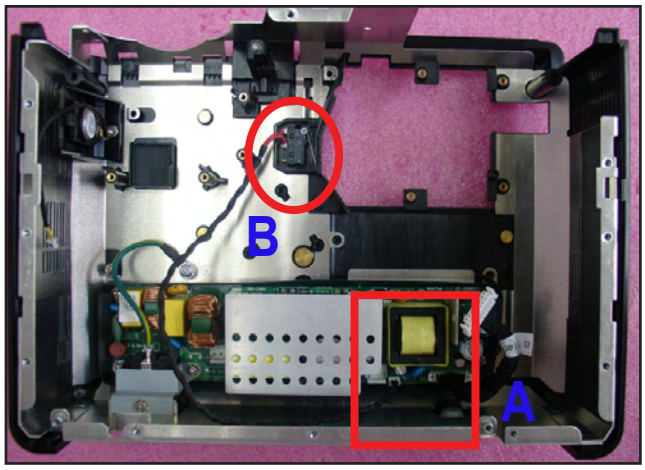
3. Unscrew 2 screws(as red circle).
4. Unscrew 1 screw(as yellow circle).
5. Unplug 3 connectors (as green square).
5. Disassemble Lamp Driver from Lamp Driver Support Shielding.
6. Take off lamp cables.

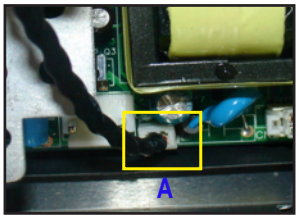


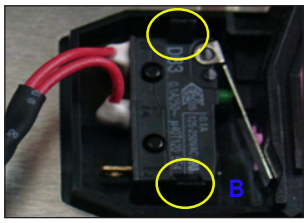


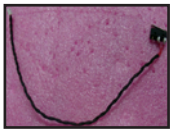
2-16 Disassemble Interrupt Switch Module

1. Unplug 1 connector (as yellow square) from LVPS.
2. Remove 2 tenons (as yellow circle) to disassemble Interrupt Switch Module.



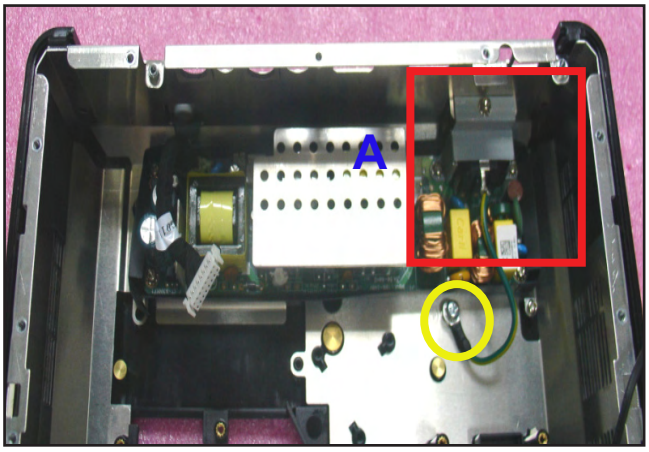


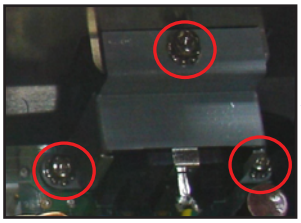


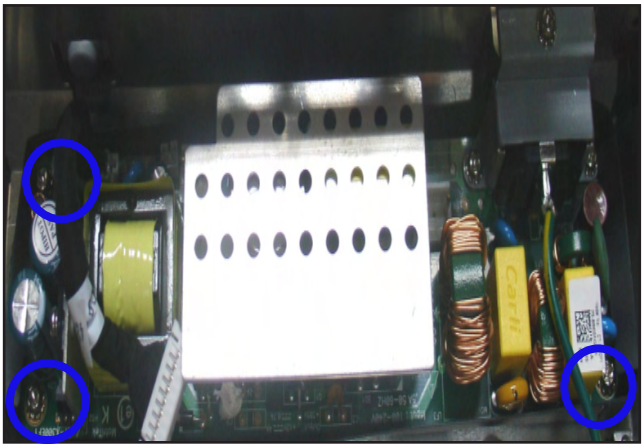


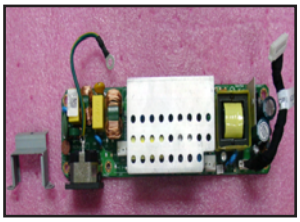
2-17 Disassemble LVPS Module

1. Unscrew 3 screws (as red circle) to take off AC Inlet Bracket.
2. Unscrew 1 ground screw (as yellow cirle).
3. Unscrew 3 screws (as blue circle) to disassemble LVPS Bracket & Mylar.



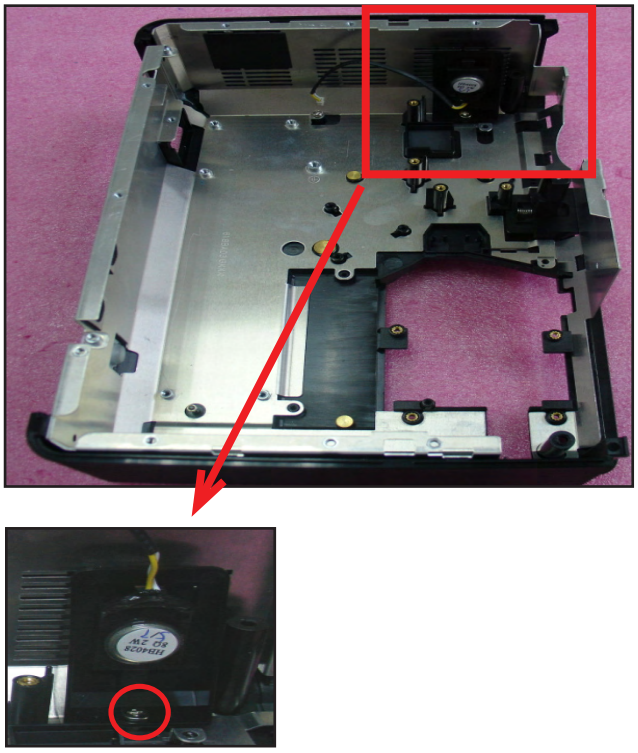


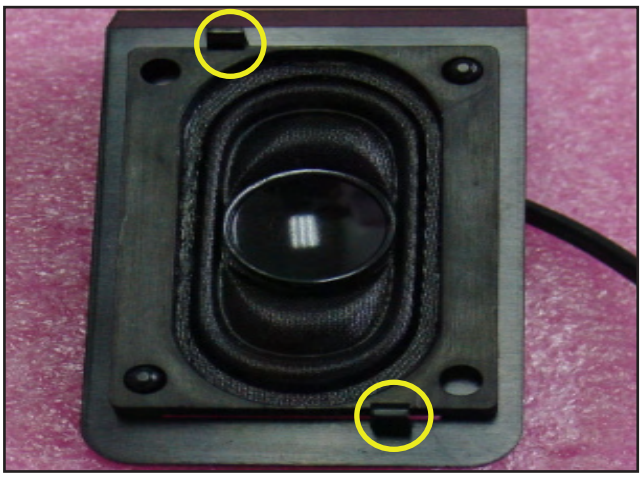


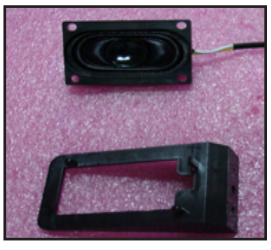


2-18 Disassemble Speaker Module

1. Unscrew 1 screw (as red circle) to disassemble speaker module.
2. Press 2 tenons (as yellow circle) to disassemble Speaker and Speaker Holder.

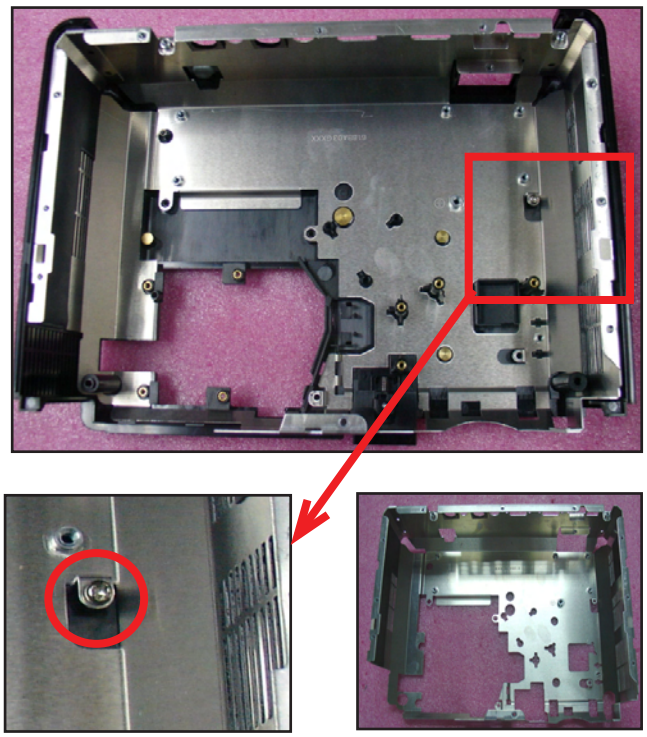






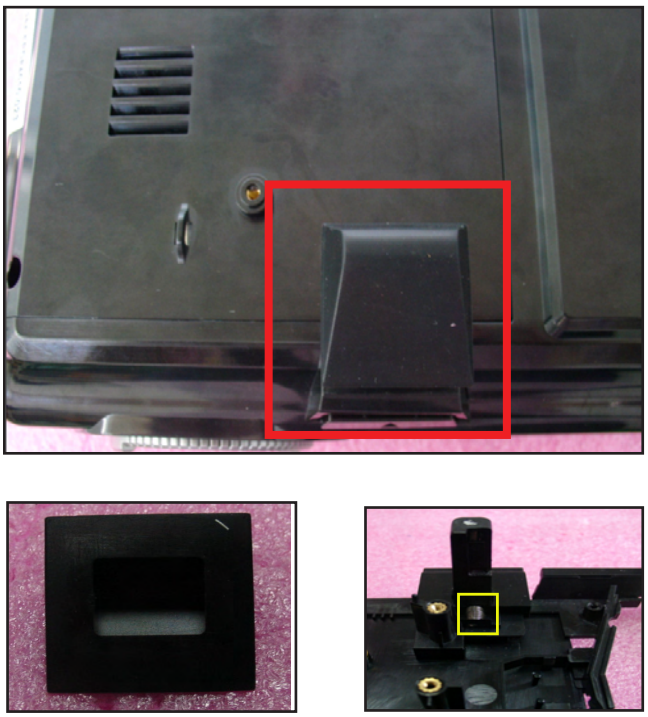
2-19 Disassemble Bottom Support Module

1. Unscrew 1 screw (as red circle) to disassemble Bottom Support Module.

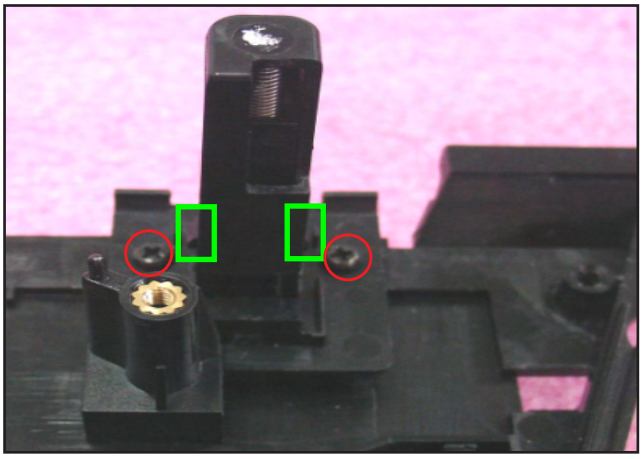


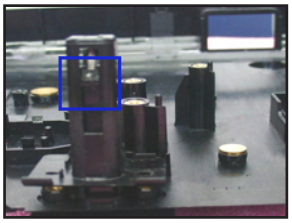
2-20 Disassemble Elevator Module

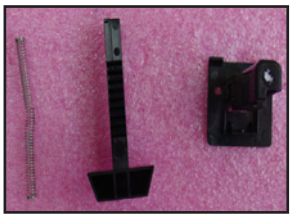
1. Disassemble the Rubber (as red square).
2. Disassemble 1 Spring (as yellow square).



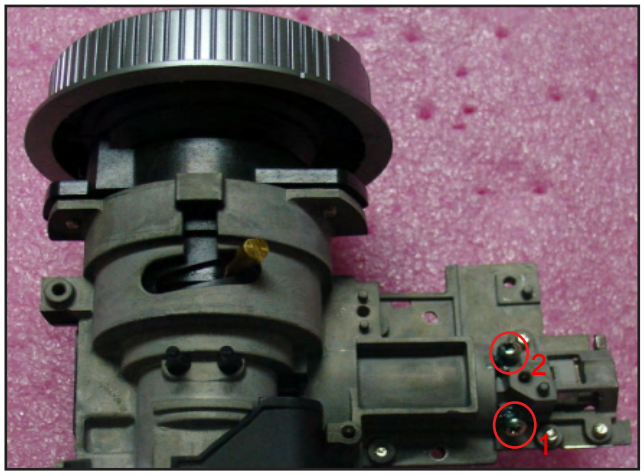
3. Press 2 tenons (as green square) to disassemble Elevator Holder.
4. Unscrew 2 screws (as red circle), then press 1 tenon (as blue square) to disassemble Elevator Foot.







2-21 Rod Adjustment



1. Environment adjustment
   - The distance between the engine and the screen is 2.37M
   - This process should be done at a dark environment. (under 5 Lux)
2. Procedure adjustment
   - Change the screen to “white screen.”
   - Adjust the screws by using the rod on the engine module to readjust the image.

("screw 1" should be asjusted first, and

then "screw 2". Adjust until the

yellowish or bluish parts disappeared.)

3. Abnormal image inspection

   - It should not have any abnormal color at the rim of the image by estimating through the eyes.

Note: - To avoid over adjusting the rod.

- After the opreation, please use the glue to fix the screws.

2-22 Re-write Lamp Usage Hour

1. Get into service mode

   - Press (power→left→left→menu) to get into service mode

2. Select "RD Menu".

3. The "Lamp Life Calculate Hours" = "Full Mode Hours Test" + "Eco Mode Hours Test".

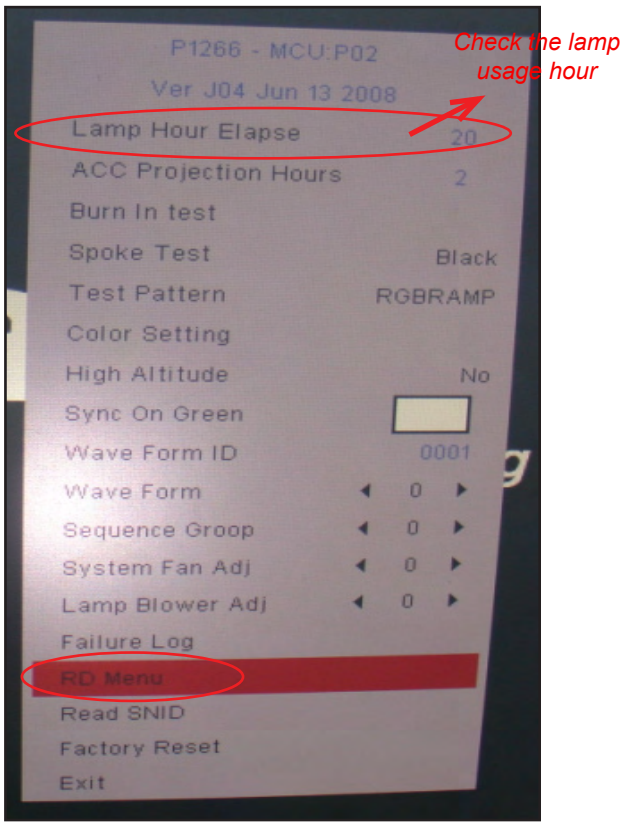
   Select "Full Mode Hours Test", then use

   left or right key to re-write the lamp hour

   back to previous lamp usage hour.

   The way of re-writing "Eco Mode Hours

   Test" is the same as "Full Mode Hours

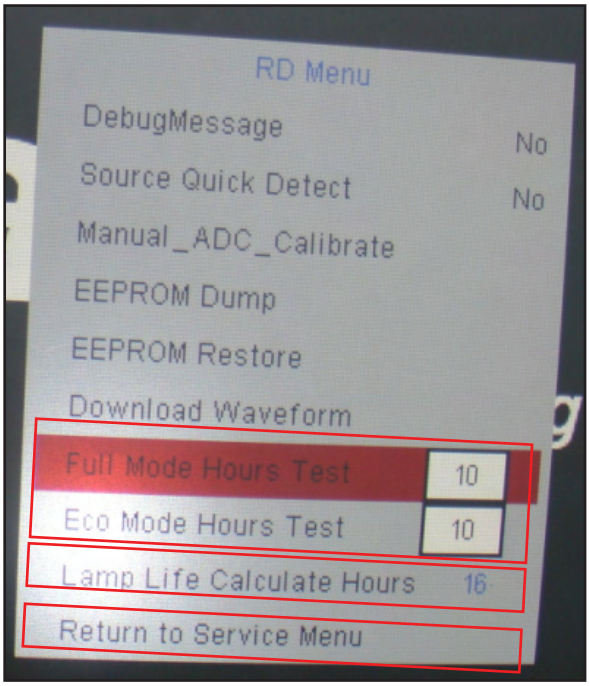


Test”.

4. Choose “Return to Service Menu”.
5. Choose “Exit”.

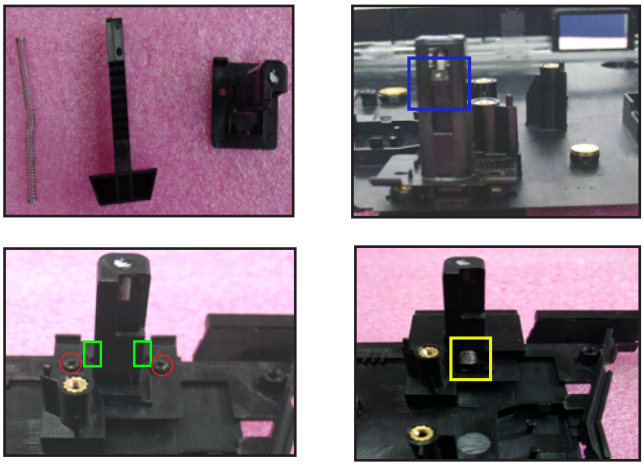
Note: left key = decrease lamp hour

right key =increase lamp hour

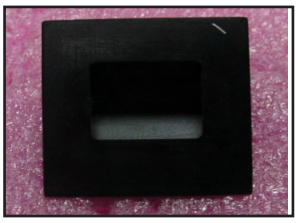


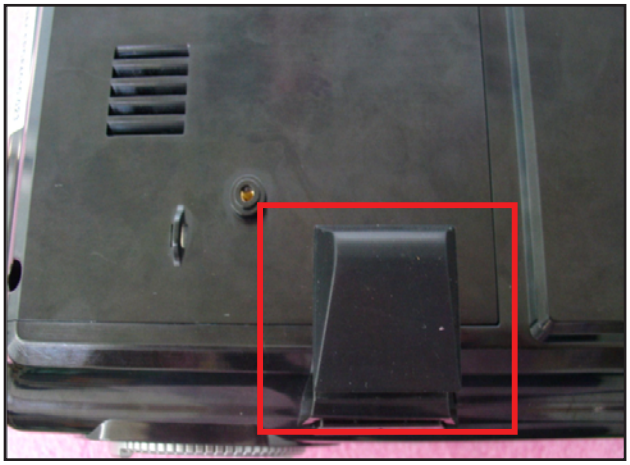
2-23 Assemble Elevator Module

1. Fasten 1 tenon (as blue square) to assemble ElevatorRoot. Then screw 2 screws (as red circle).
2. Fasten 2 tenons (as green square) to assemble Elevator Holder.
3. Assemble 1 Spring (as yellow square).



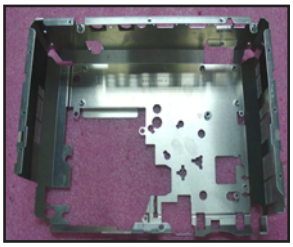
4. Assemble the Rubber (as red square).

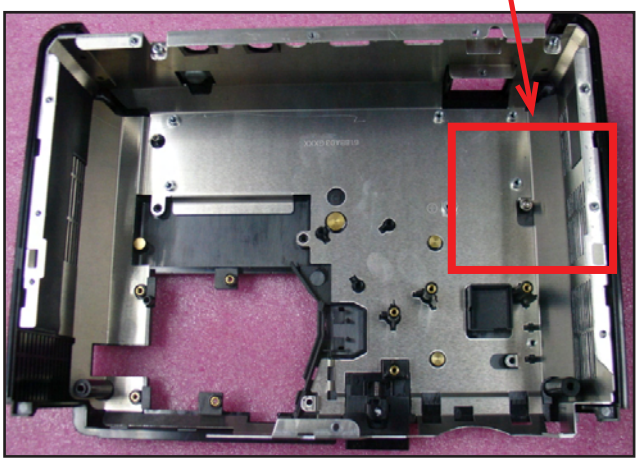




2-24 Assemble Bottom Support Module

1. Screw 1 screw (as red circle) to assemble Bottom Support Module.

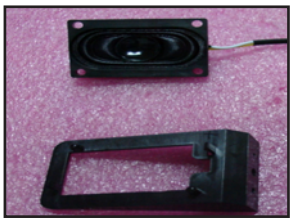


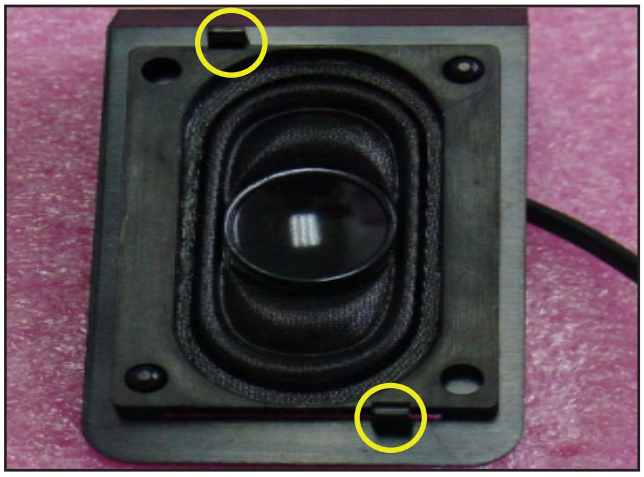


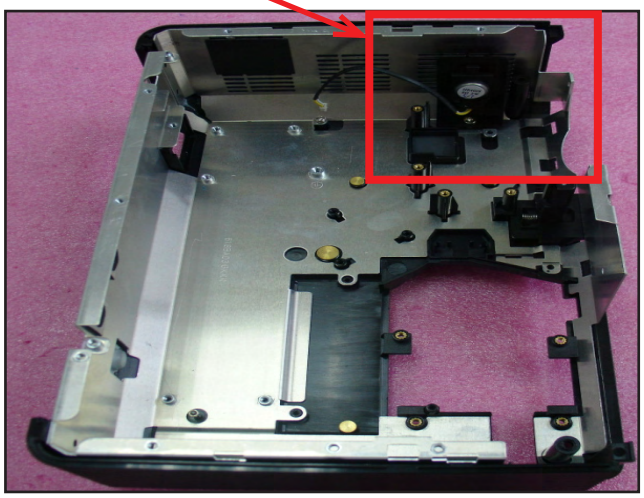
2-25 Assemble Speaker Module

1. Fasten 2 tenons (as yellow circle) to assemble Speaker and Speaker Holder.
2. Screw 1 screw (as red circle) to assemble Speaker Module.

.

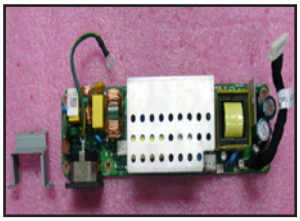


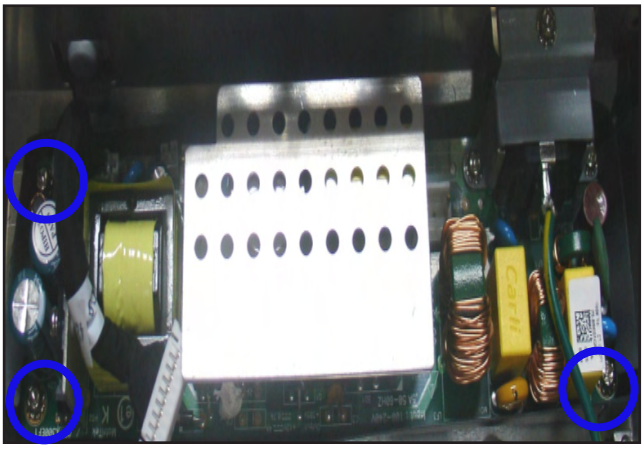


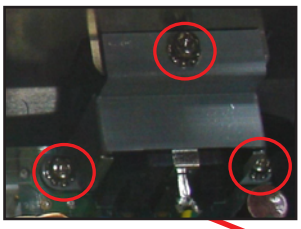


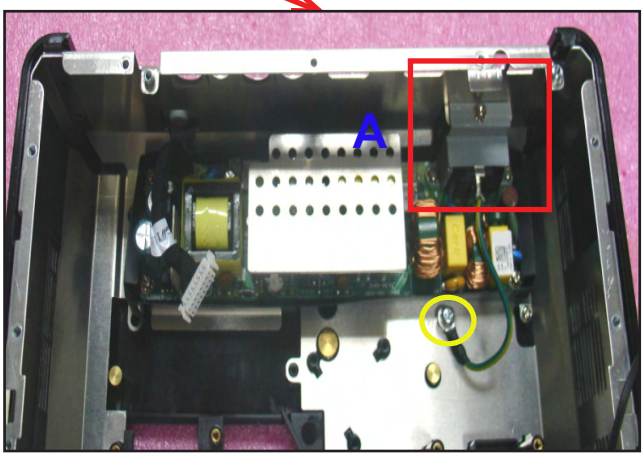
2-26 Assemble LVPS Module

1. Screw 3 screws (as blue circle) to assemble LVPS Bracket & Mylar.
2. Screw 1 ground screw (as yellow cirle).
3. Screw 3 screws (as red circle) to fix AC Inlet Bracket.



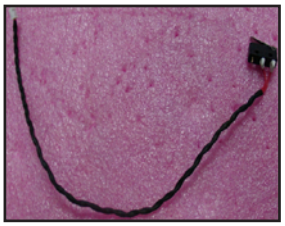


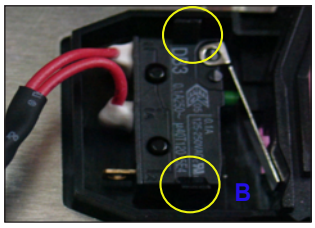


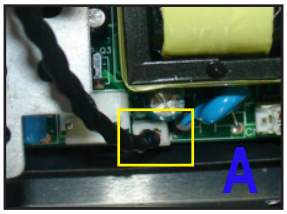


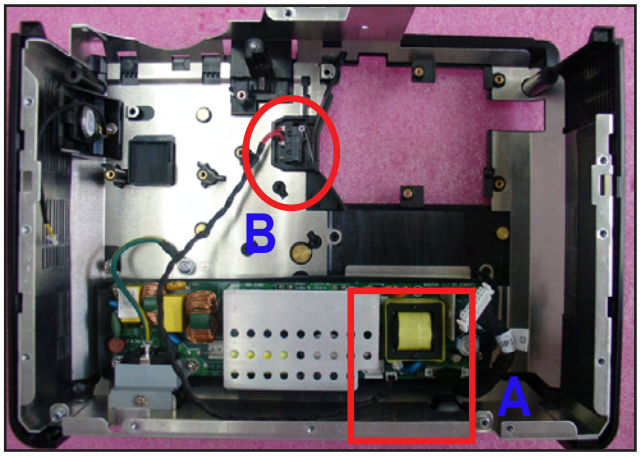
2-27 Assemble Interrupt Switch Module

1. Fasten 2 tenons (as yellow circle) to assemble Interrupt Switch Module.
2. Plug 1 connector (as yellow square) into LVPS.



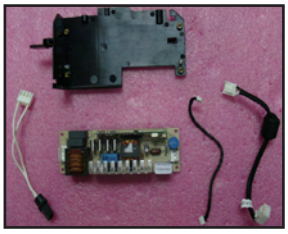


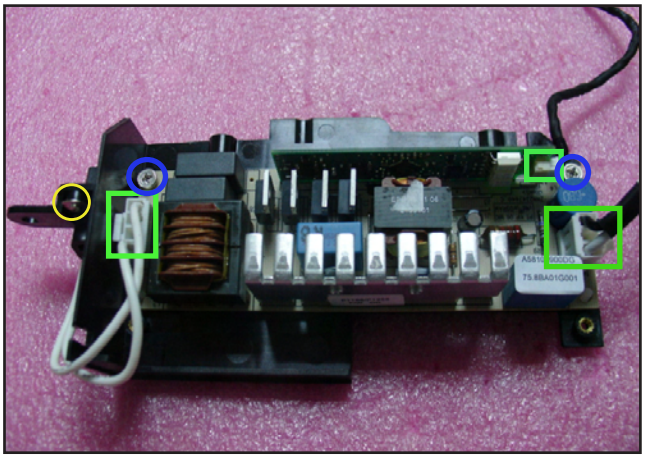




2-28 Assemble Lamp Driver Module

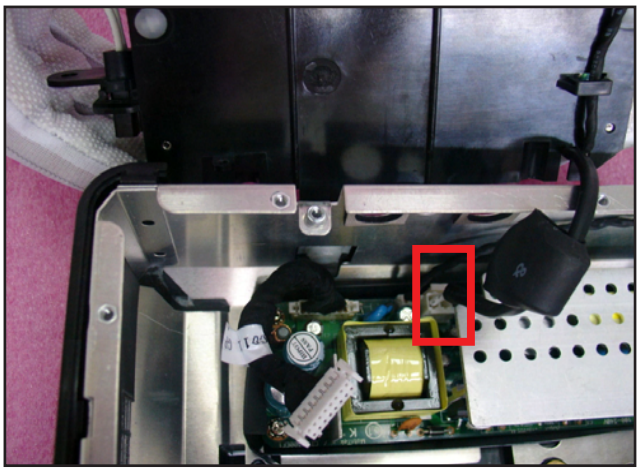
1. Aassemble Lamp Driver with Lamp Driver Support Shielding.
2. Connect Lamp Cables with Lamp Driver (as green square).
3. Screw 1 screw (as yellow circle) to assemble Lamp Cable.
4. Screw 2 screws (as blue circle).

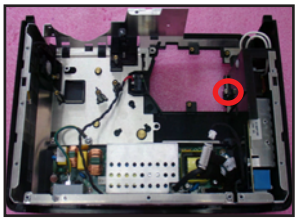




5. Plug 1 connector (as red square) to assemble Lamp Driver Module.
6. Screw 1 screw (as red circle) to assemble Lamp Driver Module.

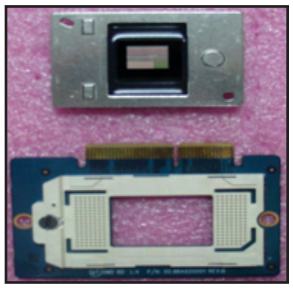
Note: - Put lamp driver module below the bottom support shielding.

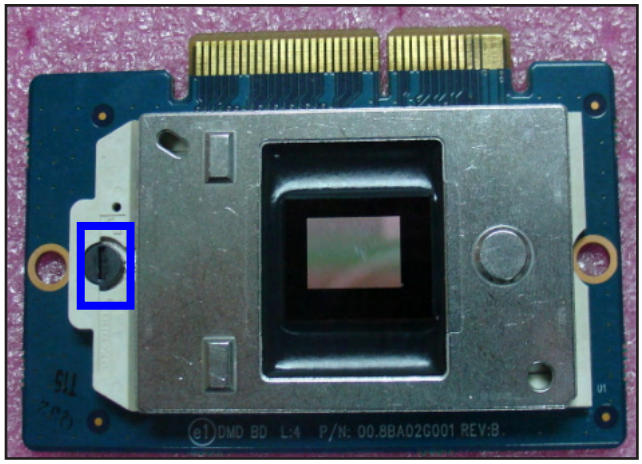




2-29 Assemble DMD Board and DMD Chip Module

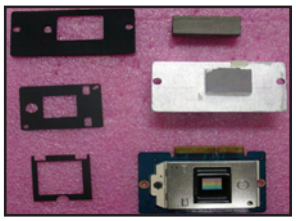
1. Rotate the switch (as blue square) to assemble DMD Chip.

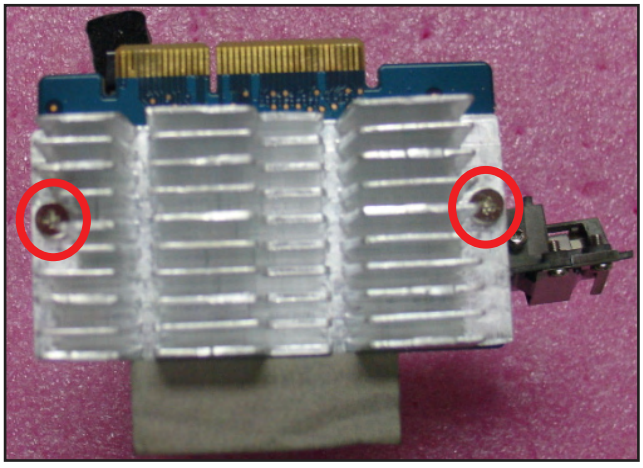




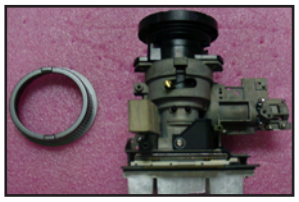
2. Assemble DMD Board and DMD Chip Module.

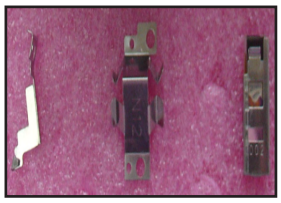
3. Screw 2 hex screws (as red circle).





2-30 AssembleEngine Module, Color Wheel Module and Rod Module



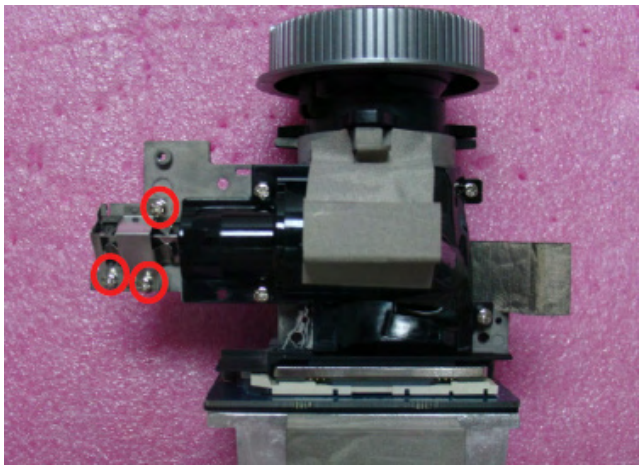


1. Assemble Focus Ring.

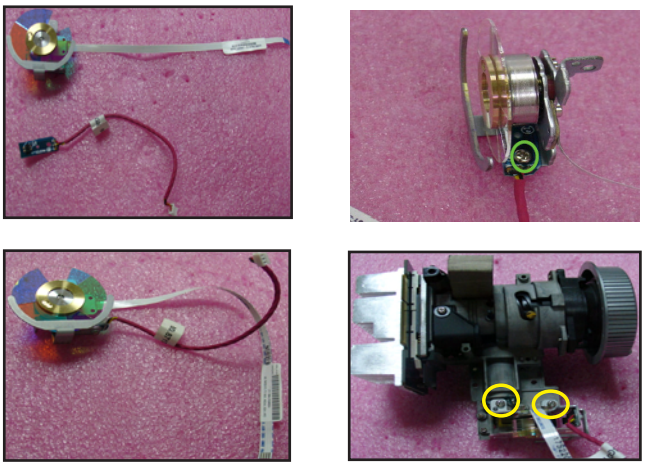
Note: - Pay attention to the three tenons when disassembling focus ring.

2. Screw 3 screws (as red circle)to assemble ROD fix plate and ROD Module.

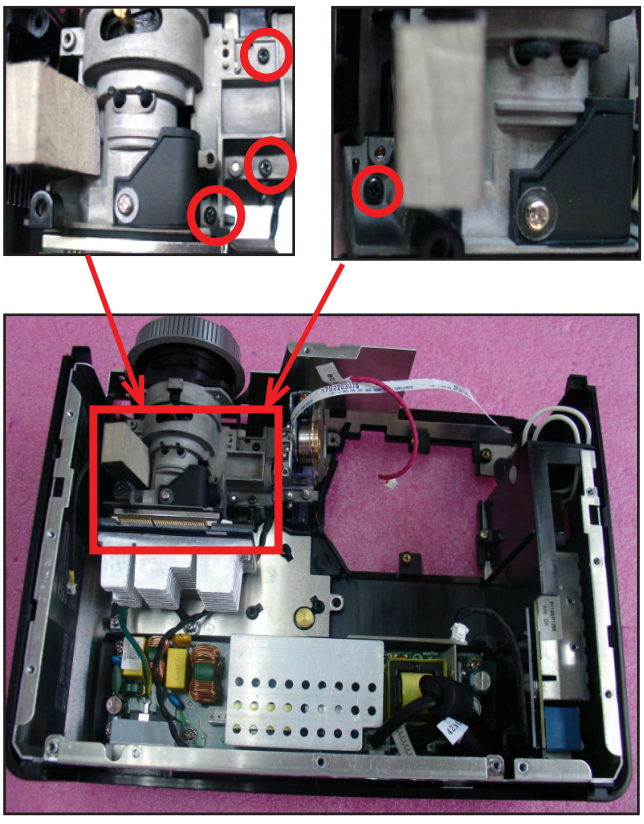
3. Screw 1 screw (as green circle) to assemble Photo Sensor with Color Wheel Module.



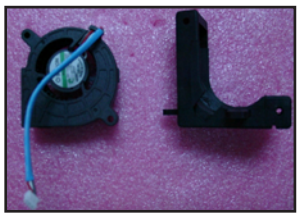
4. Screw 2 screws (as yellow circle) to assemble Color Wheel Module.

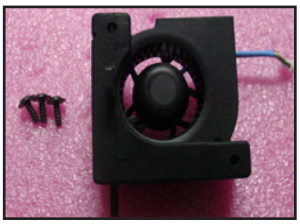


5. Screw 4 screws (as red circle) to assemble Engine Module.

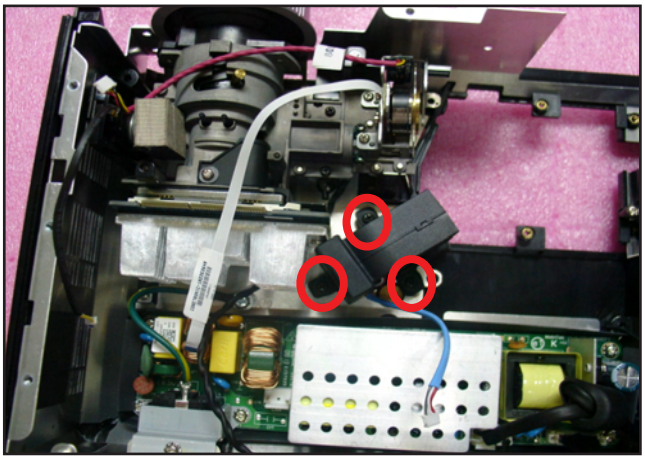


2-31 Assemble Blower Module



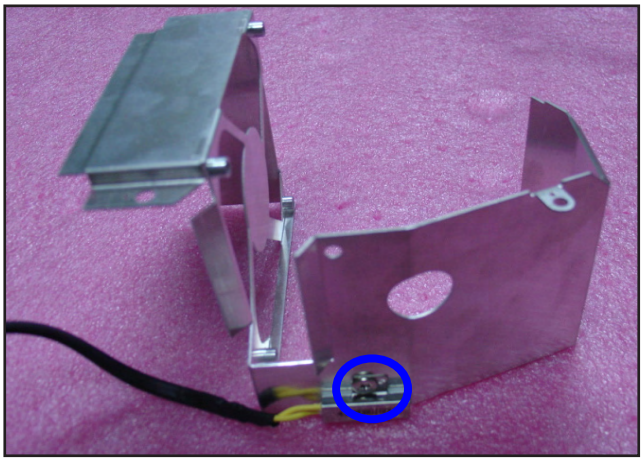


1. Assemble Blower and Blower Bracket.
2. Screw 3 screws (as red circle) to assemble Blower Module.

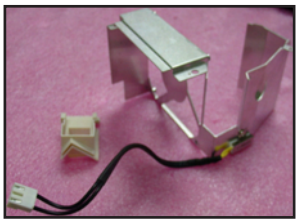


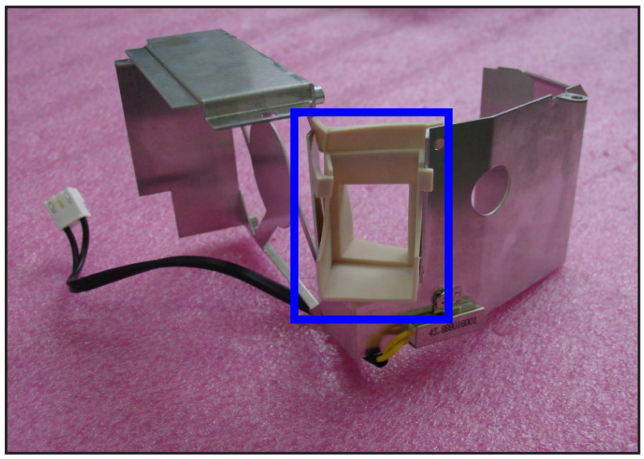
2-32 Assemble Fan Module

1. Screw 1 screw (as blue circle) to assemble Thermal Switch.

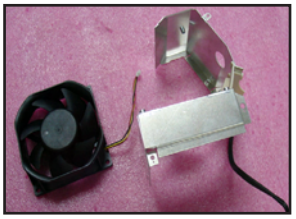


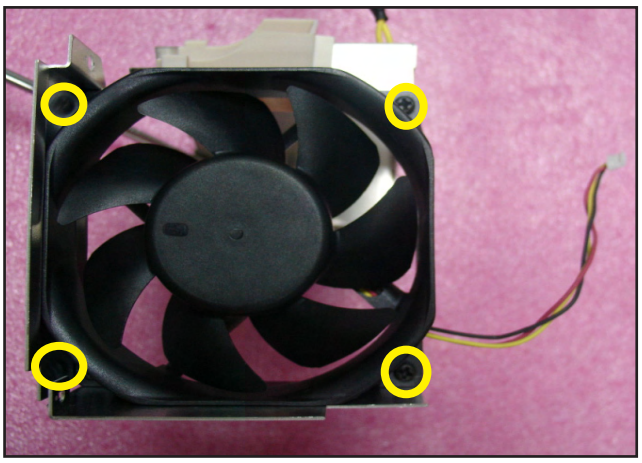
2. Assemble Lamp Blower Rubber (as blue square).



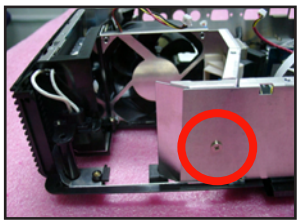


3. Screw 4 screws (as yellow circle) to assemble Fan&Bracket.

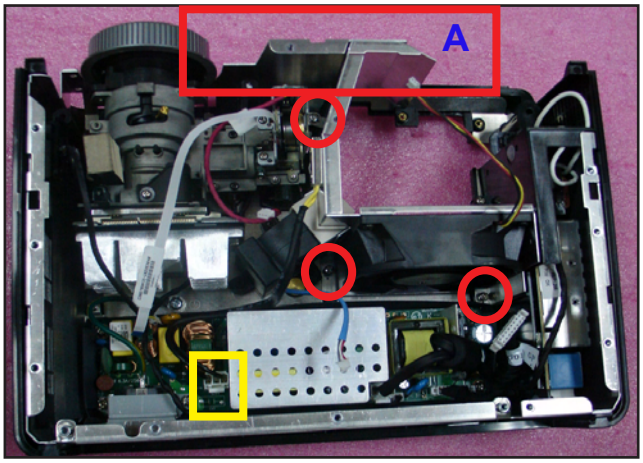




4. Plug 1 connector (as yellow square) to assemble Fan.
5. Screw 4 screws (as red circle) to assemble Fan Module.

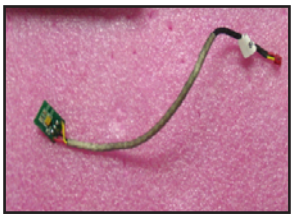


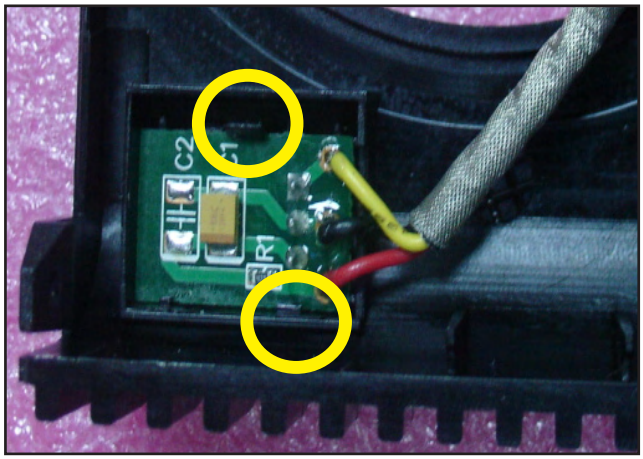
A



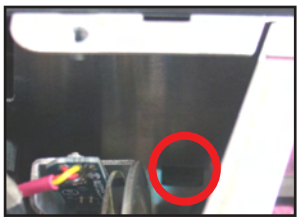
2-33 Assemble Front Cover Module

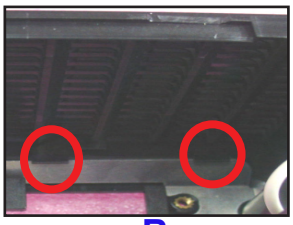
1. Fasten 2 tenons (as yellow circle) to assemble IR sensor.

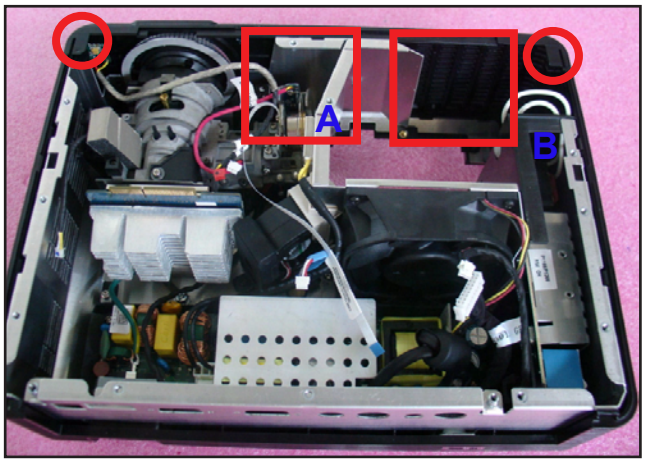




2. Fasten 5 tenons (as red circle) to assemble Front Cover.

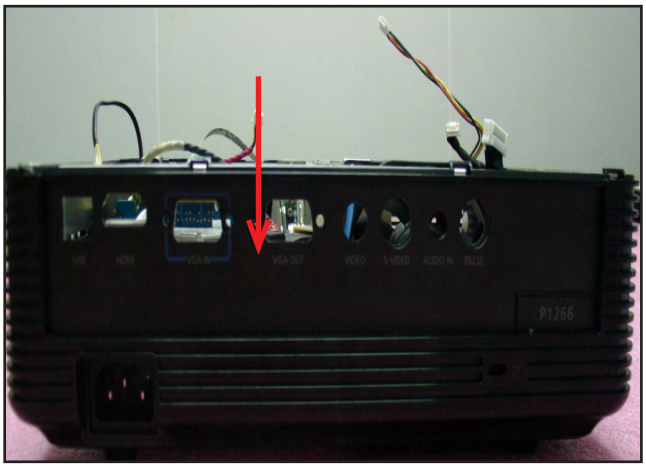




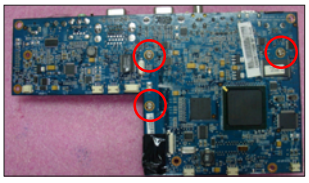


2-34 Assemble Back Cover

1. Assemble Back Cover in the direction of the red arrow.

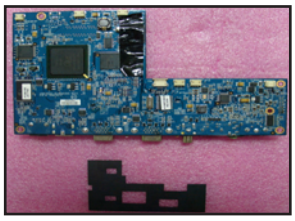


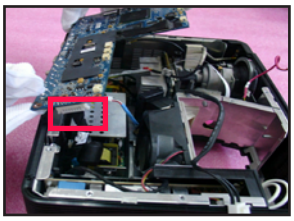
2-35 Assemble Wireless Module (only for P1266i)



1. Screw 3 screws (as red circle) to disassemble Wireless Module.
2. Turn back the Main Board Module.

2-36 Assemble Main Board Module

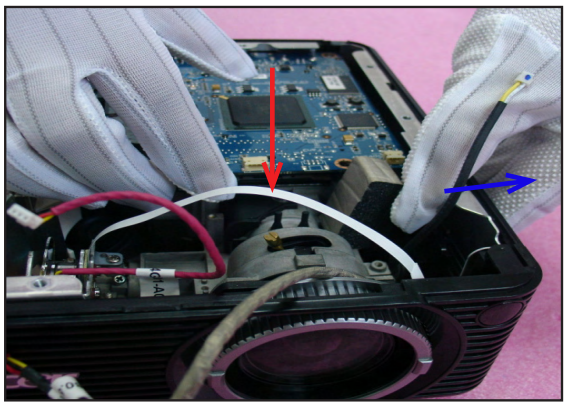


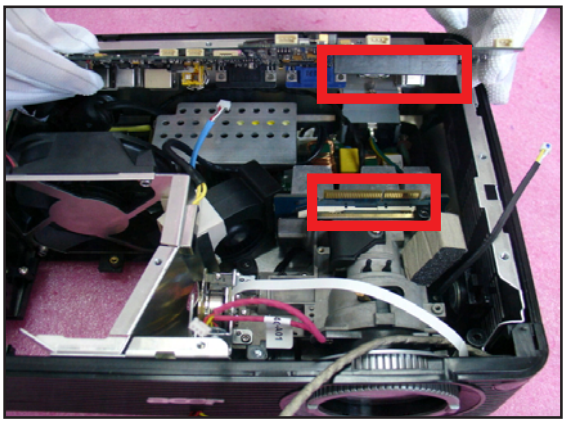


2. Assemble mylar on the Main Board.
3. Connect 1 connector (as red square).
   Note: The connector is under Main Board.

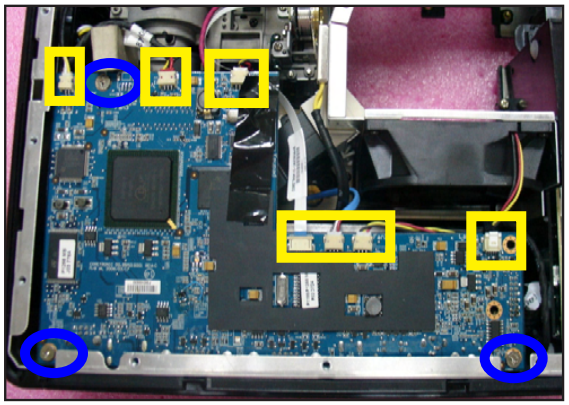
4. Press bottom support shielding as blue arrow directs, push Main Board Module as red arrow directs.

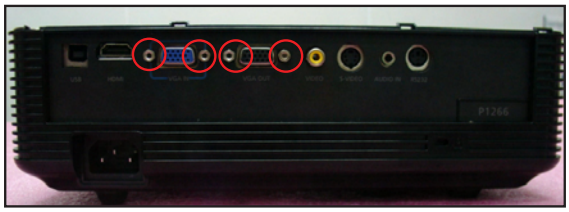
   Note: The connector on the Main Board should be connected to the DMD Board (as red square) when assembling Main Board.





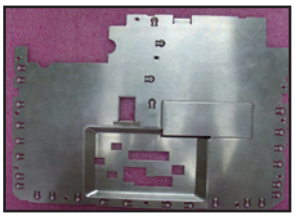
5. Plug 7 connecors (as yellow square).
6. Screw 3 screws (as blue circle).
7. Screw 4 hex screws (as red circle).

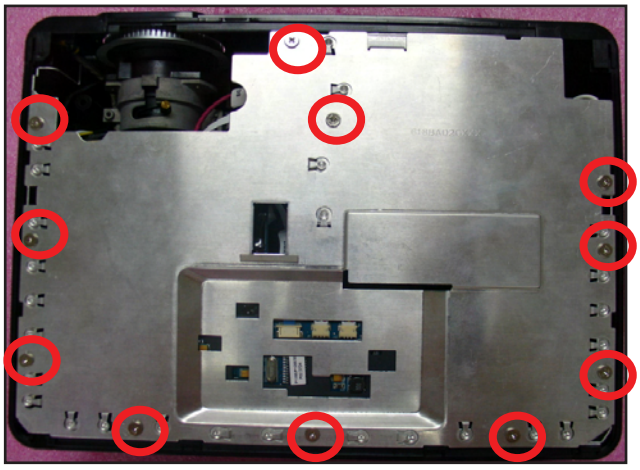




2-37 Assemble Top Shielding

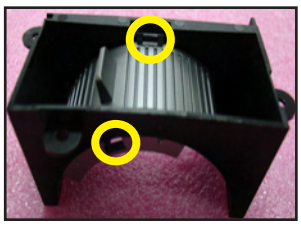
1. Assemble Top Shielding.
2. Screw 11 screws (as red circle) on Top Shielding.

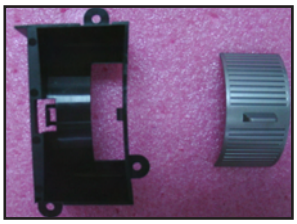


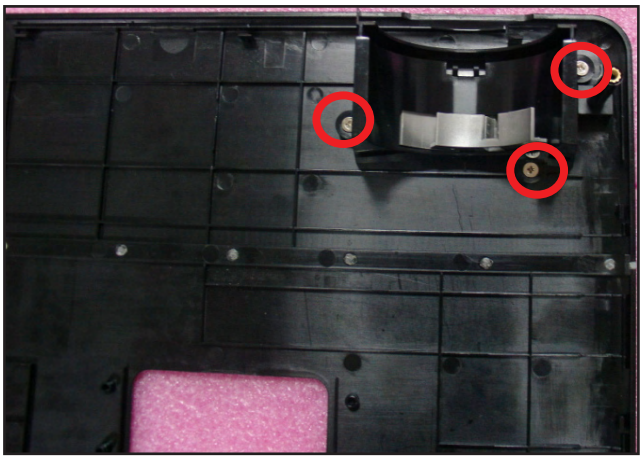


2-38 Assemble Zoom Ring

1. Fasten 2 tenons (as yellow circle) to assemble Zoom Ring.
2. Screw 3 screws (as red circle).

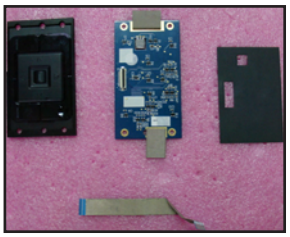


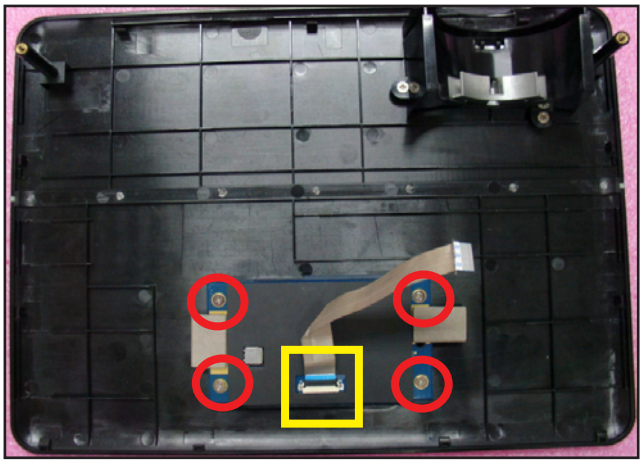




2-39 Assemble Keypad Module

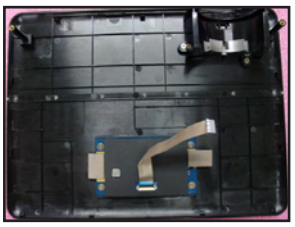
1. Assemble Keypad Board,Keypad Board Bracket and Mylar.
2. Plug 1 FPC Cable (as yellow square).
3. Screw 4 screws (as red circle).

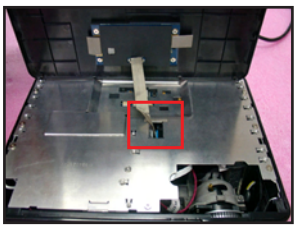




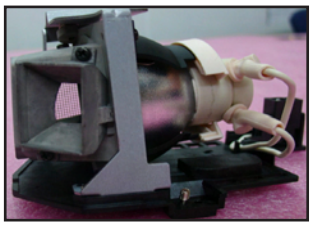
2-40 Assemble Top Cover Module

1. Assemble the Top Cover Module.
2. Unplug 1 connector (as red square).
3. Turn the projector to backside, screw 2 screws (as red circle) on Back Cover.

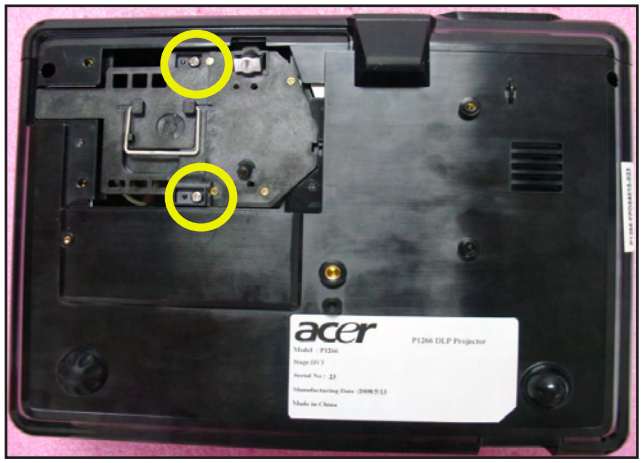




2-41 Assemble Lamp Cover Module and Lamp Module



1. Screw 2 screws (as yellow circle) to assemble Lamp Module.



2. Screw 2 screws (as red circle) to assemble Lamp Cover Module.

Chapter 3

Troubleshooting

3-1 LED Lighting Message

NO.	Message	Lamp LED	Temp LED	Power LED	
		Red	Red	Red	Blue
1	Standby (power cord plugged in)	--	--	V	--
3	Power button ON	--	--	--	V
4	Lamp retry	--	--	--	Quick flashing
5	Turning off (cooling state)	--	--	Quick flashing	--
6	Turning off (cooling completed)	--	--	V	--
7	Error (thermal failure)	--	V	--	--
8	Error (fan lock failure)	--	Quick flashing	--	V
9	Error (lamp breakdown)	V	--	--	V
10	Error (color Wheel fail)	Quick flashing	--	--	V

Note: Steady Light: "V", *No Light:* "--"

3-2 Beep Sound

Power on (as soon as power button pressed)	So (0.3s)
Power on (lamp lighting failed)	2 x {So(0.1s) – Off(0.1s)} per lighting failure 12s interval for each trial lighting. Max 4 times of trial
Power on (lens cap was not opened, for the model with sliding lens cover only)	2 x {So(0.1s) – Off(0.1s)} periodically per 3 seconds, Totally 5 cycles. Turn off projector after 5 cycles.
Close lens cap while projector is operating (for the model with sliding lens cover only)	2 x {So(0.1s) – Off(0.1s)} periodically per 3 seconds, Totally 5 cycles. Turn off projector after 5 cycles.
Power off (power button pressed twice)	So(0.3s)
Fan lock	So(0.1s) periodically per second
Overheat	2 x {So(0.1s) – Off(0.1s)} periodically per second
Lamp error	3 x {So(0.1s) – Off(0.1s)} periodically per second
Lamp Life reminding	3 x {Do(0.2s) – Off(0.8s) – So(0.2s) – Off(0.8s)} with reminding message
Presentation Timer (time is up)	3 x {Do(0.1s) – Off(0.9s)} - So(0.5s)

3-3 Main Procedure

No	Symptom	Procedure
1	No Power	- Ensure the Power Cord and AC Power Outlet are securely connected - Check Lamp Cover and Interrupt Switch - Ensure all connectors are securely connected and aren't broken - Check Lamp driver - Check LVPS - Check Main Board
2	Auto Shut Down	- Check LED Status a. Temp LED Flashing Red - Check Fan - Check Main Board b. Temp LED Light Red - Check Thermal Switch - Check Vents - Check Main Board c. Lamp LED Flashing Red - Check Color Wheel - Check Photo Sensor Board - Check Main Board d. Lamp LED Light Red - Check Lamp - Check Lamp Driver - Check Main Board
3	No Light On	- Ensure all connectors are securely connected and aren't broken - Check Lamp Module - Check Lamp driver - Check LVPS - Check Main Board
4	No Image	- Ensure the Signal Cable and Source work as well (If you connect multiple sources at the same time, use the "Source"button on the control panel to swtich) - Ensure all connectors are securely connected and aren't broken - Check Main Board - Check DMD Board - Check DMD Chip

No	Symptom	Procedure
5	Mechanical Noise	- Check Color Wheel - Check Fan Module
6	Line Bar / Line Defect	- Sometimes it's because of the DMD Chip and the DMD Board did not assemble properly - Check DMD Board - Check DMD Chip - Check Main Board
7	Image Flicker	- Do "Reset" of the OSD Menu - Ensure the Signal Cable and Source work as well - Check Lamp Module - Check Color Wheel - Check DMD Board - Check Main Board
8	Color Abnormal	- Do "Reset" of the OSD Menu - Adjust Color Wheel Index - Check Main Board - Check Color Wheel
9	Poor Uniformity / Shadow	- Ensure the Projection Screen without dirt - Ensure the Projection Lens is clean - Ensure the Brightness is within spec. (Replace the Lamp if the Brightness is less than spec.) - Ensure DMD Chip is clean - Check Engine Module
10	Dead Pixel / Dust (Out of spec.)	- Ensure the Projection Screen without dirt - Ensure the Projection Lens is clean - Clean DMD Chip and Engine Module - Check DMD Chip - Check Engine Module
11	Garbage Image	- Ensure the Signal Cable and Source work as well - Check Main Board - Check DMD Board

No	Symptom	Procedure
12	Remote Control / Control Panel Failed	- Remote Control a. Check Battery b. Check Remote Control c. IR Receiver - Control Panel a. Check FPC b. Check Keypad c. Check Main Board
13	Function Abnormal	- Do “Reset” of the OSD Menu - Check Main Board - Check DMD Board
14	WLAN & LAN Fail (only for P1266i)	- Ensure you have set up the right IP address and the connection is OK (network LED should be light up) - Check the Antenna - Check the Wireless Module - Check the Main Board

No	Symptom	Procedure
15	Forgetting Password (adminstrator Password)	- An unique Universal Password which is printed on the Security Card. This unique password is a back door of Administrator Password which will be accepted by projector anytime no matter what the Administrator Password is. - How to get the Universal Password? (1) Click the “AcerSNID” (2) Input SNID number.(SNID number is on the Security Card)  (3) Click“Calculate”.Then the Universal Password will ap -pear. 
Chapter 4

Function Test & Alignment Procedure

4-1 Test Equipment Needed

- IBM PC with XGA resolution and Wireless Network Card
- DVD player with Multi-system (NTSC/PAL/SECAM), equipped “Component”, “S-Video” , “Composite” and "HDMI".
- HDTV Source (480P, 720P, 1080P)
- Minolta CL-100
- Quantum Data 802B or CHROMA2327 (Color Video Signal & Pattern Generator)
- After changing parts, check the information below.

4-2 Service Mode

1. Turn on the projector and input the signal
2. Do the following actions sequentially to get into service mode
   (1) Press "Power→Left→Left→Menu".
   (2) Service mode will be shown.
   (3) After confirming the configuration, press "Exit" to exit.

4-3 OSD Reset

1. After final QC step, we have to erase all saved change again and restore the OSD default setting. The following actions will allow you to erase all end-users' settings and restore the default setting:
   (1) Please get into OSD menu.
   (2) To execute "Reset" function.

4-4 Test Condition

- Circumstance brightness: Dark room less than 5.0 lux.
- Inspection distance: 1.8 M~2.5 M functional inspection.
- Screen size: 60 inches diagonal
- After repairing each P1166 / P1266 / P1266i / P1166P / P1266P, the unit should be run-in (refer to the table below)

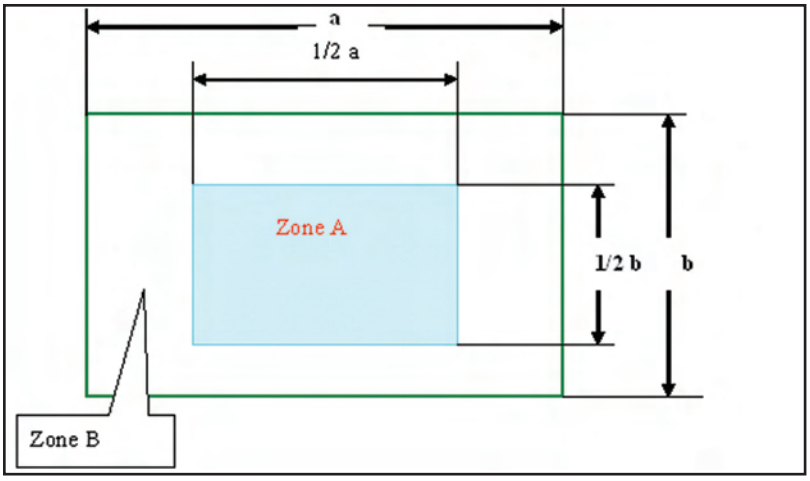
Symptom	Run-in Time
Normal repair	2 hours
NFF	4 hours
Auto shut down	6 hours

- Get into Burn-In Mode

** Cycle setting is based on the defect symptoms. ie: If it is NFF, the run-in time is 4 hours. You have to set the lamp on for 50 min. and lamp off for 10 min for 4 cycles.*

Press power > left > left > Menu	
Choose Burn-In Test > enter	
Lamp On (Min)	Press right key to adjust the time (50)
Lamp Off (Min)	Press right key to adjust the time (10)
Set burn in cycle	Press right key to adjust the cycle
After setting up the time, choose Burn-In mode and hit enter	

Screen Defects (While replacing DMD Chip, DMD BD and MB)



< Figure: Zone A &B Definition >

4-5 Test Inspection Procedure

Charge parts / Update	Main Board	Firmware	Color Wheel	Lamp Module	EDID	Lamp Driver
Version Update	v	v			v	
Color Wheel Index	v		v			
Reset lamp hour				v		
OSD Reset	v	v				
EDID	v					
Re-write Lamp Hour Usage	v					
Default Language Reset	v	v			v	
Waveform Download						v

Note: If Color appears abnormal after changing Main Board Module, please do Color Wheel index adjustment.

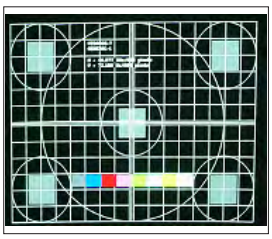
4-6 PC MODE

Note: Test signal: analog 800 x 600@60Hz (for P1166/ P166P),
analog 1024 x 768@60Hz (for P1266 / P1266i / P1266P). We take P1266 for example.

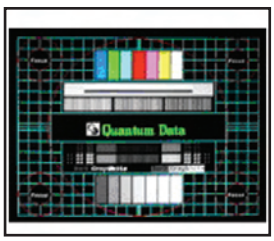
1. Frequency and tracking boundary

Procedure

- Test equipment: video generator.
- Test signal: analog 1024 x 768@60Hz
- Test Pattern: general-1 or master
- Check and see if the image sharpness is well-performed.
- If not re-adjust by the following steps:
  (1) Select "Frequency" function to adjust the



General-1



Master

total pixel number of pixel clock in one line period.

(2) Select "Tracking" function and use right or left arrow key to adjust the value to minimize video flicker.

- Adjust Resync or Frequency/Tracking/H. Position/V. Position to the inner screen.

Inspection item

- Eliminate visual wavy noise by Rsync, Frequency or Tracking selection.
- Check if there is noise on the screen.
- Horizontal and vertical position of the video should be adjustable to the screen frame.

Criteria

- If there is noise on the screen, the product is considered as failure product.
- If there is noise on the screen, use auto or manual “frequency” function or “tracking” function to adjust the screen.
- The PC mode functionally sure be workable include support format with frequency and auto detected functional will be workable.

2. Light Leak

Procedure

- Test equipment: video generator.
- Test signal: analog 1024 x 768@60Hz
- Test Pattern: gray 30 patterns
- Check if the light leaks.

* Light leak on reflective edge, eyecatcher, bond-wires and exposed metal.

Gray 30

Inspection item

- Light leak check.
- Bright blemish (dirty).

Criteria

- The pattern can accept four bright leakage at most on gray 30 pattern.
- Ref. the Defect specification table

Note: The defect criteria follows TI specification.

3. Blemish (Dark)

Procedure	- Test equipment: video generator. - Test signal: analog 1024 x 768@60Hz. - Test Pattern: blue 60
Inspection item	- Dark blemish check. (dirty)
Criteria	- It is acceptable to have four dark blemish at most on blue 60 pattern. - Ref. the Defect specification table Note: The defect criteria follows TI specification.

Blue 60

4. Dead Pixel (Bright pixel)

Procedure	- Test equipment: video generator. - Test signal: analog 1024 x 768@60Hz. - Test Pattern: full black
Inspection item	- Bright pixel check. Note: Frame dimension under operative zone1 inch
Criteria	- Bright pixel is unacceptable. - Ref. the Defect specification table Note: The defect criteria follows TI specification.

Full black

5. Dead Pixel (Dark pixel)

Procedure	- Test equipment: video generator. - Test signal: analog 1024 x 768@60Hz. - Test Pattern: full white
Inspection item	- Dead pixels check. - White pattern (IRE=100) - Adjacent dark pixel.
Criteria	- The number of the dead pixels should be less or equal to 6 pixels. - Adjacent pixel with each other is unacceptable. - Ref. the Defect specification table Note: The defect criteria follows TI specification.

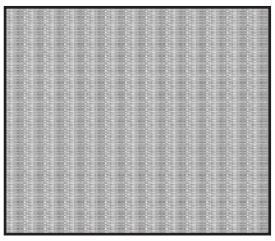
Full white

6. Focus test

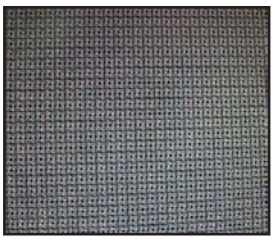
Procedure
- Test equipment: video generator.
- Test signal: analog 1024 x 768@60Hz
- Test Pattern: full screen or MEME Sony

Inspection item
- Focus check

Criteria
- From screen 1.95 M via visual to check the focus, look at the entire screen, focus shall be clear, crisp, and sharp over the entire surface of the display pattern. (Blur word on one of the corner after adjustment is acceptable. However, the word should at least be recognizable.)



Full screen



MEME Sony

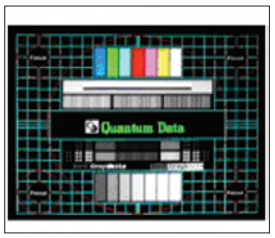
7. Color performance

Procedure
- Test equipment: video generator.
- Test signal: HDMI 720p, 1080P
- Test Pattern: Master, In focus II or SMPTE RP-133

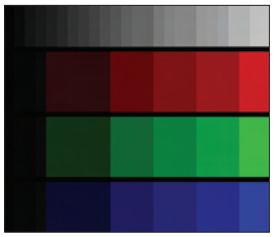
* Please refer to 4-2 to get into service mode. Use 720P & 1080i signal, master pattern to do HDTV test. Color cannot discolor to purple and blue.

Inspection item
- Check if each color level is well-functioned.
- color saturation

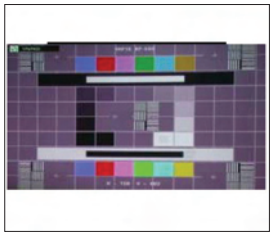
Criteria
- Screen appears normal. It should not have any abnormal condition, such as lines appear on the screen and so on.
- Color appears normal.
- It is acceptable to have few lines flashing at the center and on the edge of 1080i image. However, rest of the image should appears stable.
- RGBW should all appear normal on the screen and sort from R -G-B-W.
- Color levels should be sufficient and normal.



Master



InFocus II / 64 gray RGBW



SMPTE RP-133

(the unidentified color levels on both left and right sides should not over 8 color levels.)

- Gray level should not have abnormal color or heavy lines.
- The PC mode functionally sure be workable include support format with frequency and auto detected functional will be workable

4-7 PC calibration

Procedure

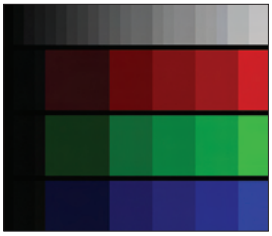
- Test equipment: video generator
- Once main board is changed, PC calibration should be done as well.
  (1) Test signal analog: 1024 x 768@60Hz
  (2) Test pattern: White(up) Black(down)
- Note
  (1) Calibration pattern should be in fill screen mode.
  (2) Please refer to 4-2 and 4-3 to get into Service Mode and OSD Reset.
  (3) Choose and access PC Calibration for correction in service mode. Choose “menu“ to leave the service mode after all.

White/Black

Check pattern

- Test signal: analog 1024 x 768@60Hz
- Test pattern: In focus II or 64 gray RGBW

* After finishing ADC adjustment, check 64 gray RGBW pattern.



In focus II
/64 gray RGBW

Inspection item

- Color sturations

Criteria

- There should not have any lack of RGBW. The color should appear normal and sort in right order.
- Color levels should be sufficient and normal. (the unidentified color levels on both left and right sides should not over 8 color levels.)
- Gray level should not have abnormal color or heavy lines.

4-8 Defect specification table

Order	Symptom	Pattern	Criteria
1	Bright pixel (dots)	Black pattern (IRE=O)	A+B=0
2	Dark pixel(dots)	White pattern	A+B=6
3	Unstable pixel (dots)	Any pattern	A+B=1
4	Adjacent dark pixel (dots)	Any pattern	A+B=0
5	Dark blemish (Dirty)	Blue 60 pattern	A+B=4 (diameter <1/2 inch)
6	Bright blemish (Dirty)	Gray 30 pattern	A+B=4 (diameter <1/2 inch)
7	Bright dot on frame	Black pattern	2

4-9 Video Performance

1. CVBS

Procedure - Test equipment: DVD player
- Test signal: CVBS

Inspection item - Video performance test

Inspection Distance - 1.8 M ~2.5 M

Criteria - Check any abnormal color, line distortion or any noise on the screen.
- Check the sound from speakers.

Motion video

2. S-Video

Procedure	- Test equipment: DVD player - Test signal: S-Video
Inspection item	- Video performance test
Inspection Distance	- 1.8 M ~2.5 M
Criteria	- Check any abnormal color, line distortion or any noise on the screen. - Check the sound from speakers.

3. HDTV/ Component

Procedure	- Test equipment: DVD player - Test signal: YCbCr/YPbPr
Inspection item	- HDTV performance test
Inspection Distance	- 1.8 M ~2.5 M
Criteria	- Check any abnormal color, line distortion or any noise on the screen. - Check the sound from speakers.

4. Audio Test

Procedure	- Test equipment: DVD player - Test signal: CVBS
Inspection item	- Audio performance test
Inspection Distance	- 1.8 M ~2.5 M
Criteria	- Check the sound from speakers. - Check “Volume” is normal - Check “Mute” is normal

5. HDMI Test

Procedure	- Test Signal : 1080i - Equipment: DVD Player with HDMI output
Inspection item	- HDMI Test
Criteria	- Ensure if the image is well performed and the color can not discolor.

4-10 Optical Performance Measure

Inspection Condition
- Environment luminance: 5 Lux
- Product must be warmed up for 3 minutes
- Distances from the screen: 1.95 M
- Screen Size: 60 inches diagonal

1. Test equipment

Procedure
- Get into service mode: Press "Power→Left→Left→Menu".
- Select "RD menu"
- Select "Spoke test"

2. Brightness

Procedure
- Full white pattern
- Use CL100 to measure brightness values of P1~P9.
- Follow the brightness formula to calculate brightness values.

☼ Brightness Formula

Avg. (P1~ P9) x 1.1m^2

Criteria
- 1100 lumens (for P1166 / P1266)

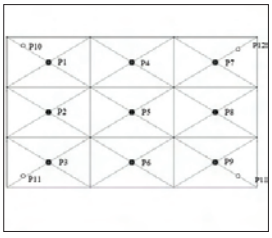
  1200 lumens (for P1266i / P1166P / P1266P)

3. Full On/Full Off Contrast

Procedure
- Full white pattern & full black pattern
- Use CL100 to measure brightness values of full white pattern P5 & full black pattern B5 (see image: full white)
- Follow Contrast formula to calculate contrast values.

☼ Contrast Formula

P5/B5



Full white pattern

Note: P5=center of white image
B5=center of black image.

Criteria • 1400: 1 (for P1166 / P1266)
1900: 1 (for P1266i / P1166P / P1266P)

Full black pattern

4. Uniformity

Procedure
- Full white pattern
- Use CL100 to measure brightness values of P1~P9 (see image: full white).
- Follow the Uniformity formula to calculate average values.

☼ Uniformity Formula

ANSI Uniformity = Avg. (P1, P3, P7, P9) / P5 x 100%

Criteria • 65%

4-11 Others

1. Functional Inspection

Keypad button - All keypad buttons must operate smoothly.

General - All OSD functions must be checked for functionality. When OSD menu is displayed, there shall be no visible peaking, ringing, streaking, or smearing artifacts on the screen.

Factory Default - The factory settings (with appropriate centring, size, geometry distortion, etc.) shall be displayed upon “Recall” is selected from OSD.

Display Size - All preset modes shall expand to full screen size using OSD
Horizontal and Vertical Size controls

Display Data Channel (DDC) - The purpose of the DDC test is to verify the DDC1/ DDC2B operation of the projector and to verify Plug & Play function.

Acoustic - High pitch sound from cooling fan and color wheel is unacceptable.

2. Check points for exterior and print pattern

Check item	Check point
Text & Pattern	Missing letters & pattern or blurry prints are unacceptable
Exterior	Dirt, scrape, water ripples and uneven color are unacceptable
Buttons	Stuck buttons are unacceptable
Focus ring	Focus ring is functioning smoothly
Logo	Missing logo, missing prints and blurry prints are unacceptable
Screw	All screws should be fixed and in right type
Pedestal	Well-functioned
Lamp Cover	It should be locked in the correct place
Plastic Parts	All plastic parts can not be broken and damaged
Safety or warning label	All safety and warning label should be visible, including all contents
Connector	All interface connectors should be complete and workable

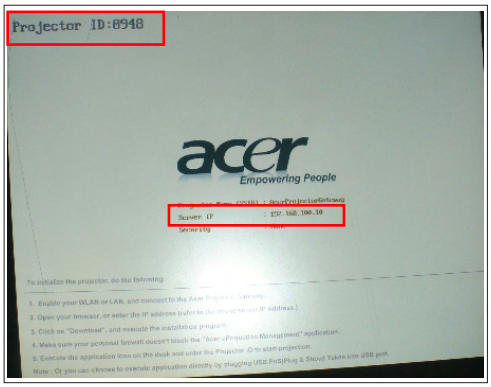
4-12 LAN and Wireless Function Test (only for P1266i)

1. Write down Projector ID and Server IP

- Plug in power cord to the projector and connect PC with projector by RJ45 cable.

- Turn on the projector.

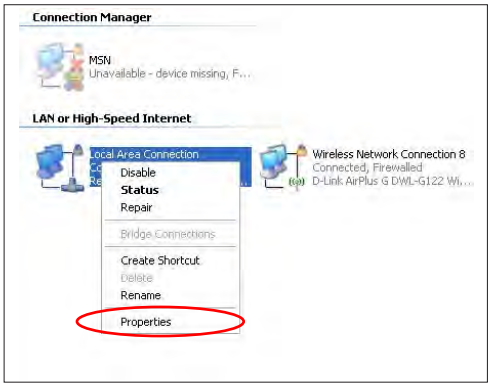
- Write down the Projector ID: "8948" and Server IP address: 192.168.100.10

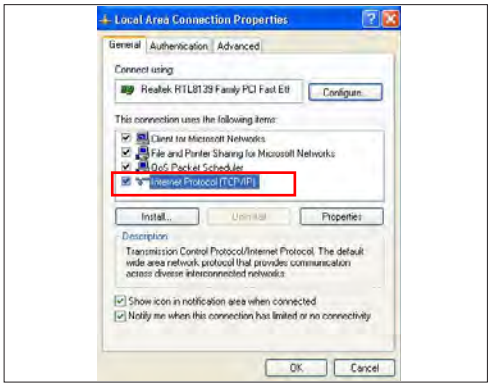


2. Local Area Setting

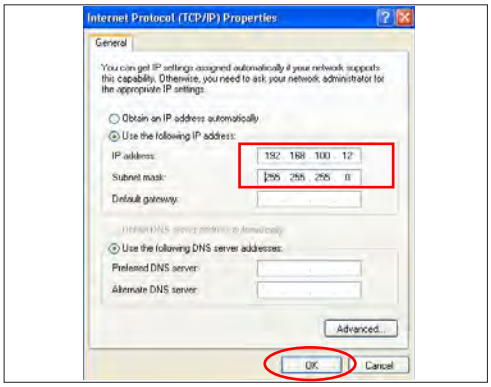
- Right click the "Local area connection", then choose "Properties".

- Double click "Internet protocol(TCP/IP)".



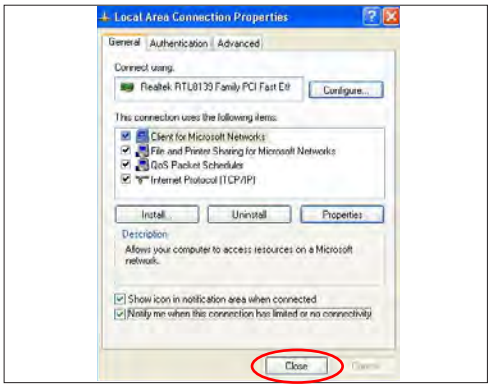


- Modify the IP address to 192.168.100.12, and modify Subnet mask to 255.255.255.0.



Note: The HOST ID (192.168.100.XXX) of PC IP address must be different from the Server IP address written down in step 1.

- Click "OK".



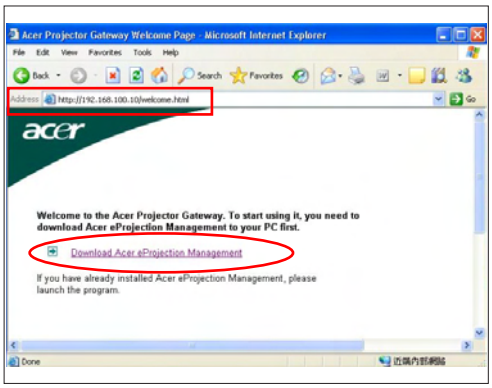
- Click "Close" to quit the setting screen.

3. Read Projector Information

- Execute "Internet Explorer".

- Visit the wireless card: http://192.168.0.100/.

- Click "Download Acer eProjection Management", then we will download the "Acer Projector Gateway" file.

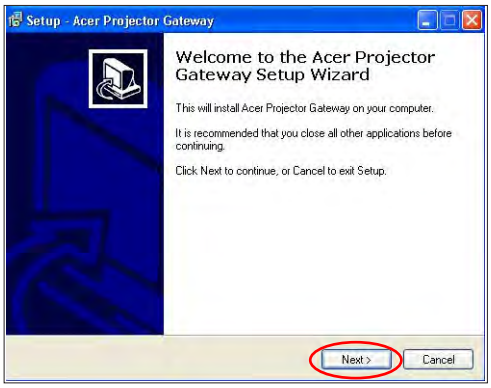


4. Acer Projector Gateway Installation

- Double click "Acer.exe" file.

- Click "Next".

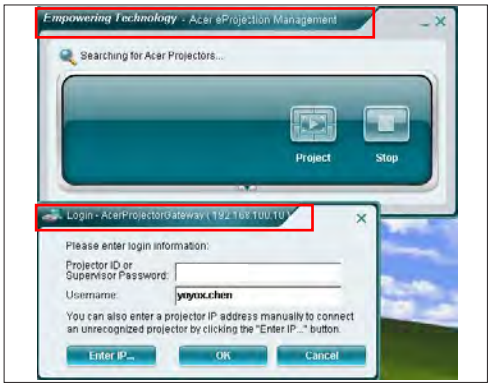
- "Empowering Technology - Acer eProjection Management" and "Login - AcerProjectorGateway" will appear on the sreen, the Installation complete.



5. LAN Function Test

- In "Projector ID or Supervisor Password" item, key in "8948" you have written down in step 1.

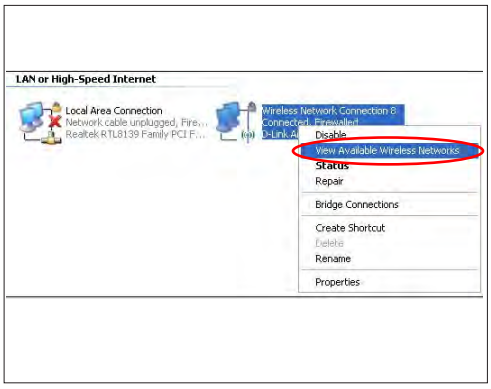
- Click "OK".



- The LAN Function should be OK if the projector projects PC signal.

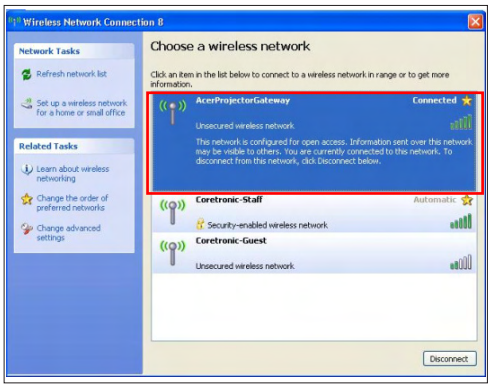
5. Wireless Network Function Test

- Unplug LAN Cable from Projector and PC.



- Right click "Wireless Network Connection", then choose "View Available Wireless Networks".

- "Wireless Network Connection" picture will appear on the screen, then double click "AcerProjectorGateway" to connect PC with wireless network.

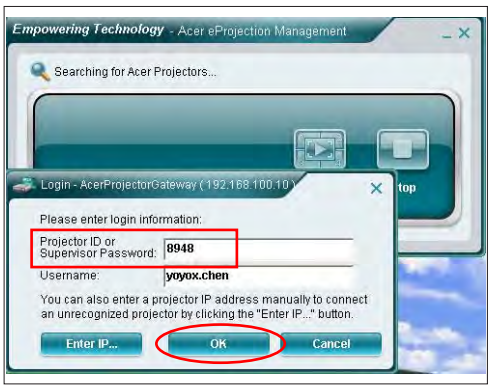


- Double click "Acer Projector Gateway".

- "Empowering Technology - Acer eProjection Management" and "Login - AcerProjectorGateway" will appear on the sreen, then key in "8948" that is you writed down the Projector ID.

- Click "OK".

- The Wireless Network Function should be OK if the projector projects PC signal.



Note: If you want to get the better signal, you may use the aerial to connect the projector.

Chapter 5

Firmware Upgrade

5-1 Equipment Needed

Software : (DDP 2230- USB)

- DLP Composer
- Firmware
- 8M Flash (8M flash has to put in PC and set right path in 5-4 step 5)

Note: Befrore firmware upgrade, extract 8M flash file to DLP composer fliles .(according to 5-4 step 1)

Hardware :

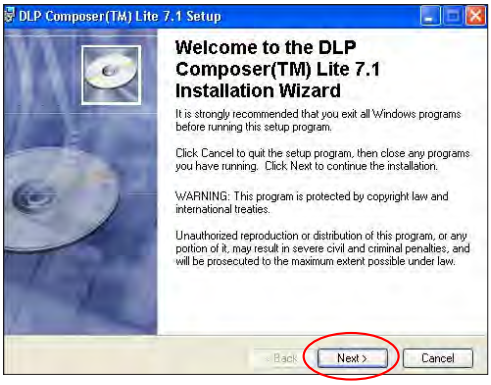
- Projector
- Power cord (42.53506G002)
- USB Cable (42.87304G001)
- PC or Laptop

Note: The FW upgrade procedure for P1166 / P1266 / P1266i / P1166P / P1266P is the same. Here we take P1266 as an example.

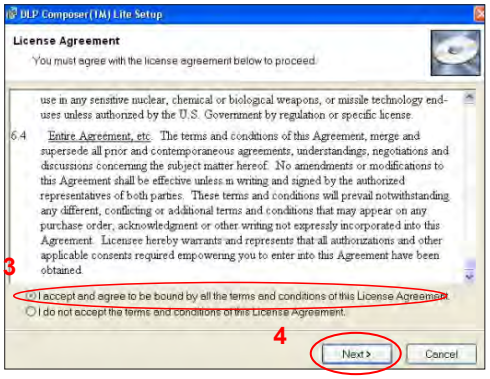
5-2 DLP Composer Lite Setup Procedure

1. Choose "DLP Composer Lite V7.1 Setup" Program.

2. Click "Next".

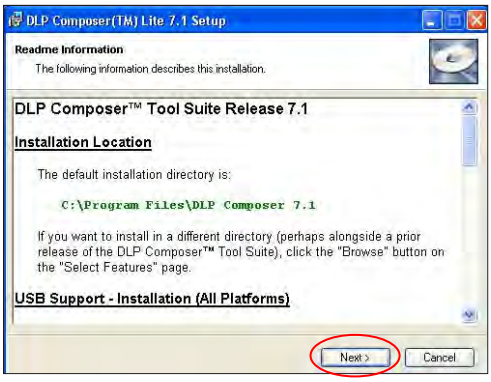


3. Read License Agreement.
   - Choose I accept and agree to be bound by all the terms and conditions of this License Agreement.

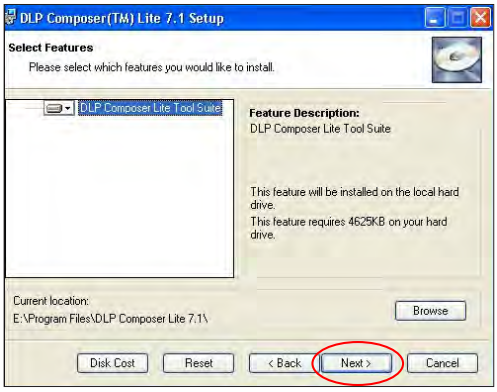


4. Click "Next".

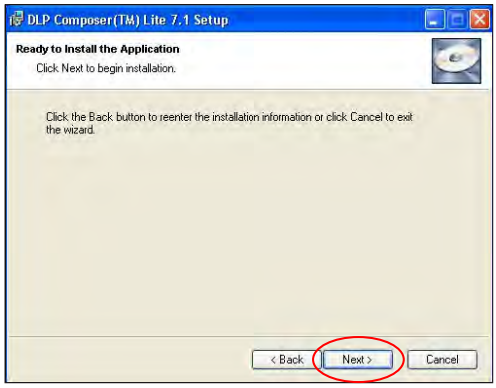
5. Click "Next".



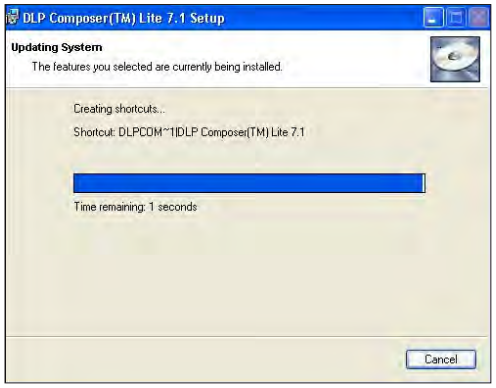
6. Click Next.



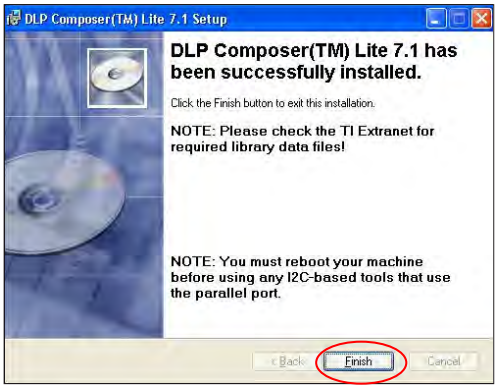
7. Click Next.



8. Writing system registry values.



9. Click Finish.



5-3 USB Driver Upgrade Procedure

1. set up

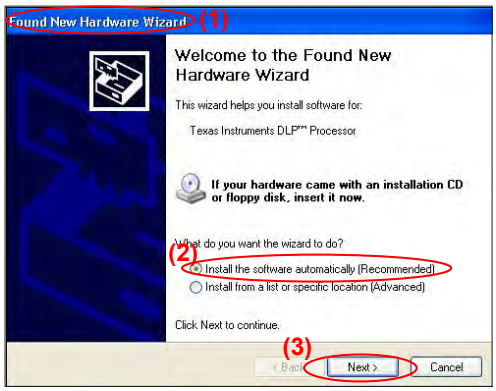
- Plug in Power cord to projector.
- Link PC USB port and projector USB port by USB Cable.

2. Execute Program

(1) Found new hardware wiszard will be appearred on the screen.

(2) Select Install the software automatically (Recommended).

(3) Then click Next.



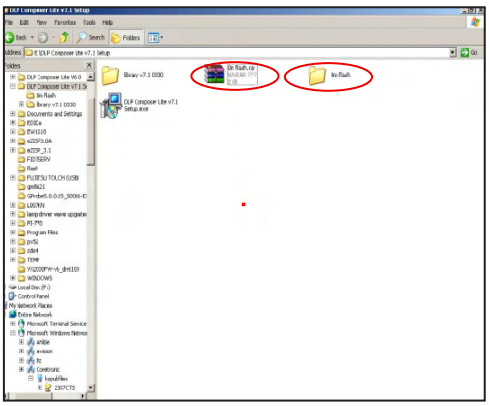
3. Finish

- Click Finish to end the installation.

Note: If you have installed the USB driver, there is no need to perform this action.

5-4 Firmware Upgrade Procedure

1. Unzip "8M flash.rar" to "DLP Composer Lite v7.1 Setp" files.



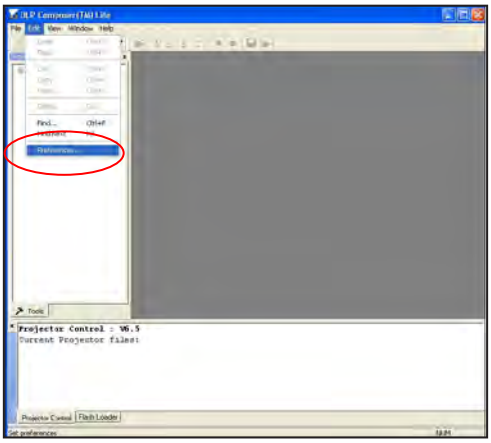
2. Set-up

   - Hold on "Power" button and plug in power cord while holding on "Power".

- Once the Lamp LED and the Temp LED light on Red, plug in USB cable into the projector and link to the USB port of PC.

Note: The system fan and the light will not opeate.

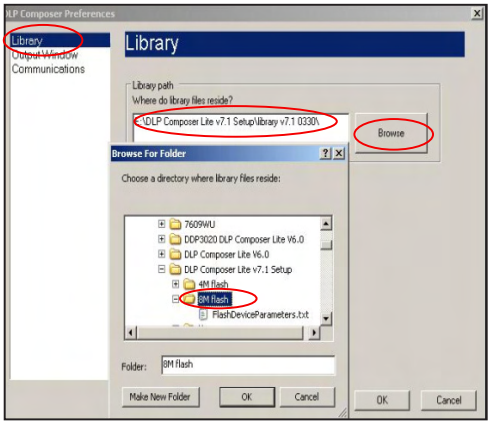
3. Execute the "DLP Compose(TM) Lite" file.



4. Click "Edit", then click "Perferences".

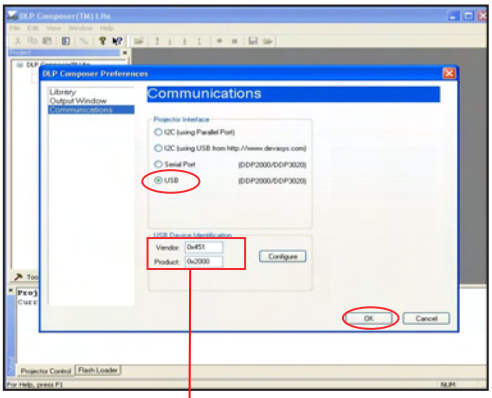
5. Click "Library".

   - Click "Browse" button and navigate to the directory where you put the library file in.



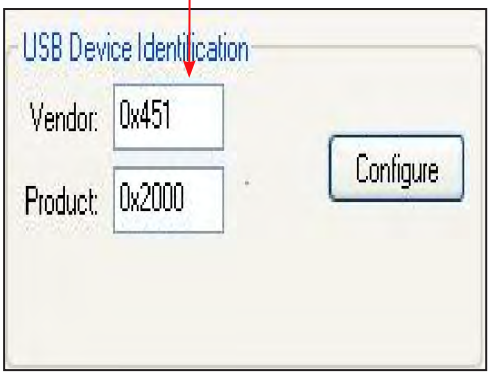
6. Select Edit\preferences\Communications

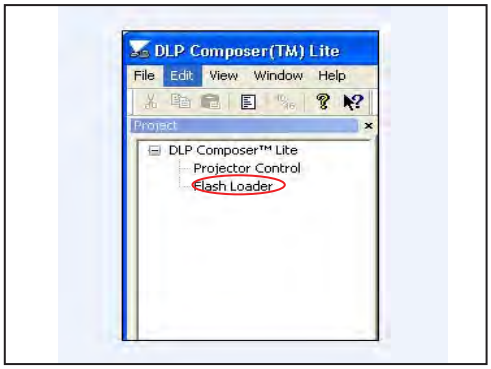
- Choose USB".
- Click OK".

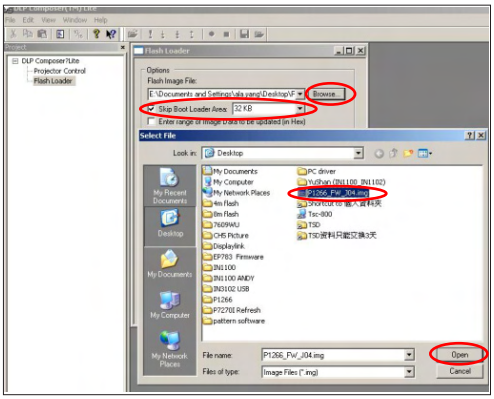


7. Choose Flash Loader.

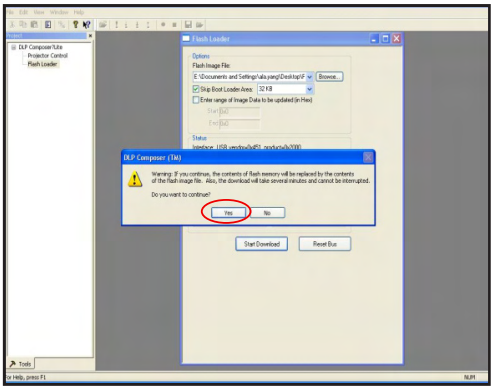
- Select the item "Skip Boot Loader Area" (select 32KB)
- Click "Browse" to search the firmware file.
- Select the FW file (*.img).
- Click "Open".





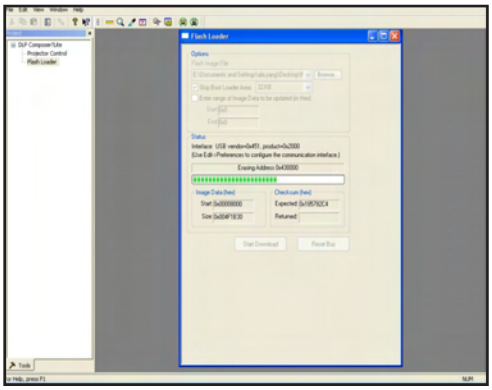


8. Click "Reset Bus" to erase the flash memory.

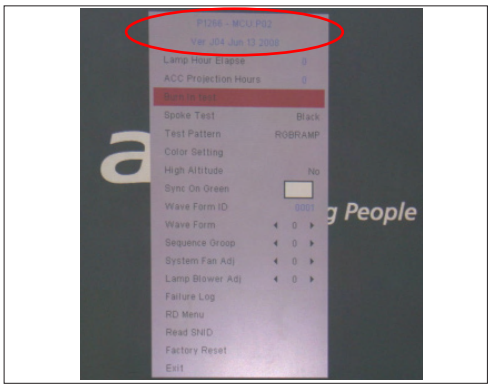


9. If the firmware is ready, click start download to process the firmware upgrade.
   - Click "Yes" to erase the flash memory.

10. When firmware upgrade process is finished, the unit return to stand-by status. The LED power lights on and appears Red.
    - Unplug USB cable and power cord and replug in power cable.



11. Restart the unit and enter the service mode to check the firmware version.
    (To enter service mode, please refer to Chapter 4 Function Test and Alignment Procedure)

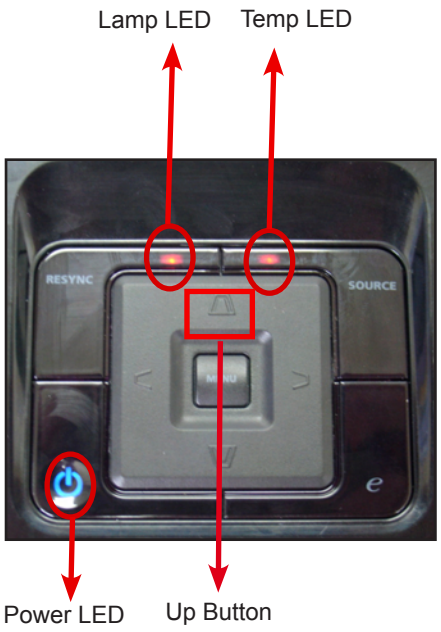


5-5 Waveform Download

1.Hold on the “up” button, then plug power cord in, the Power LED light on red,after about 5 seconds, it turns to blue and Temp LED will flash for 4 seconds. After that, the Temp LED and Lamp LED light on red, and Power LED lights blue.

2. Re-plug in power cord and turn on this projector. If the image is steady, the process is completed.

Note: When the Lamp Driver is changed, you must download the Lamp Driver Waveform.



Chapter 6

EDID Upgrade

6-1 EDID Introduction

Extended Display Identification Data is a VESA standard data format that contains basic information about a display device and its capabilities, including vendor information, maximum image size, color characteristics, factory pre-set timings, frequency range limits, and character strings for the monitor name and serial number.

The information is stored in the display and is used to communicate with the system through a Display Data Channel (DDC), which sites between the display device and the PC graphics adapter. The system uses this information for configuration purposes, so the monitor and system can work together.

Note: - If a display device has digital input ports, like DVI or HDMI, but without EDID in its main board, the display device will show no image while the input source is digital signal.

- The EDID upgrade procedure for P1166 / P1266 / P1266i / P1166P / P1266P is the same, here we take P1266 for example. After the EDID upgraded, do the " Default Language Reset".

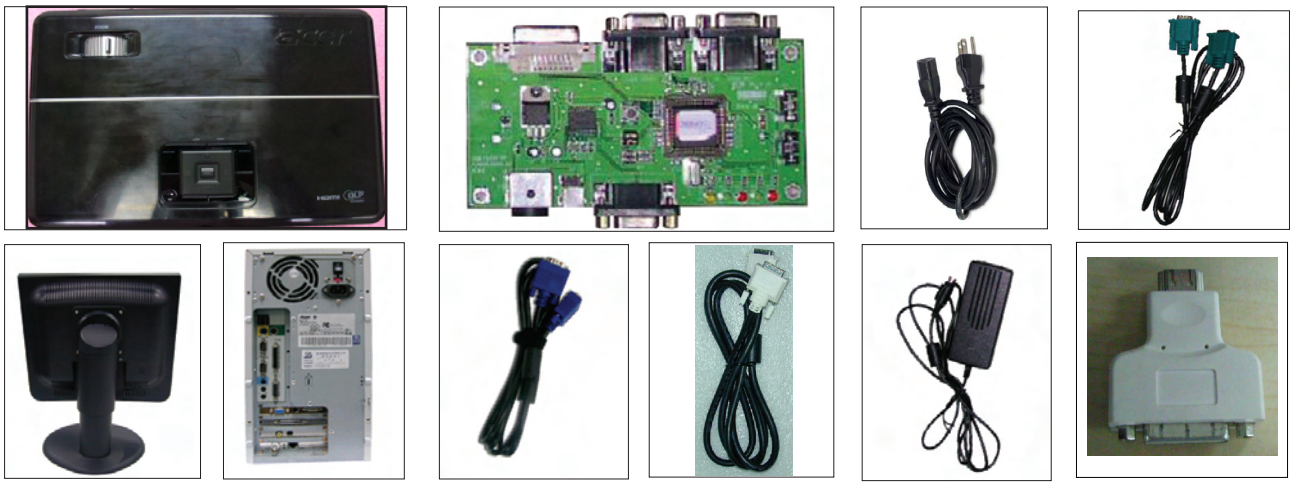
6-2 Equipment Needed

Software

- EDID Program (Generic V0.51)
- EDID File

Hardware

- Projector
- Generic Fixture (80.00001.001) for EDID Key-in (Fixture: JP3 must be closed)
- Power cord for Projector (42.53506G002)
- RS-232 9 Pin Cable (pin to pin, F-M) (42.83C07G001)
- Monitor
- PC
- VGA cable (42.87305G102)
- DVI Cable (42.83N06G001)
- Power adapter (47.57803G001) and power cord (42.53506G002) for fixture
- Adapter HDMI(M) to DVI-D(F) (42.82B13G001)



6-3 Setup Procedure (VGA)

1. Connect all ports

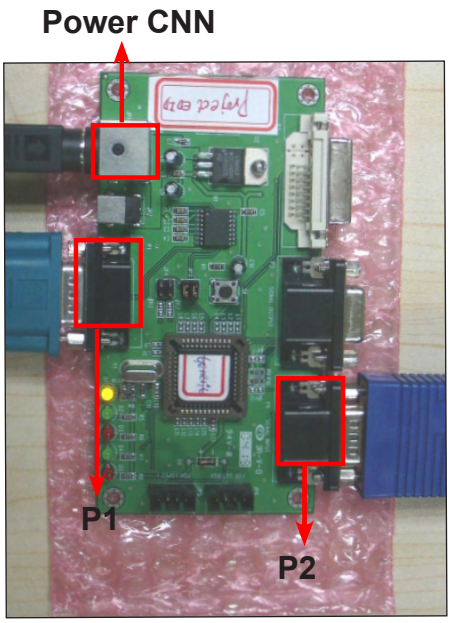
   (1) Connect P1 of Fixture with COM Port of PC/Laptop by RS232 Cable.

   (2) Connect P2 of Fixture with VGA port of Projector by VGA Cable.

   (3) Plug Power Adapter to Power CNN.

   (4) Plug Power Cord to projector.

   Note: You must confirm that the JP3 is closed in all procedure.



6-4 EDID Key-In Procedure

1. Execute EDID Program

   (1) Click on "EDID" to execute EDID program.

2. Process

   (1) Check the COM port is COM 2" (Select the COM port which you are using).

   (2) Click the Model button.

   (3) Choose the source file "ACER_P1266 EDID-B.ini (*.ini)" and then open it.

3. Process

   (1) Key in the serial number into the barcode blank space.

   (2) In Write Source Select item,select Analog.

   (3) Click "Program" button.

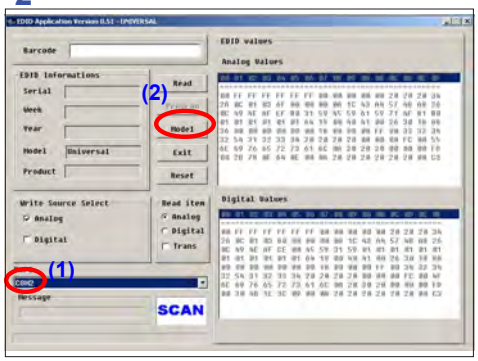
4. Process

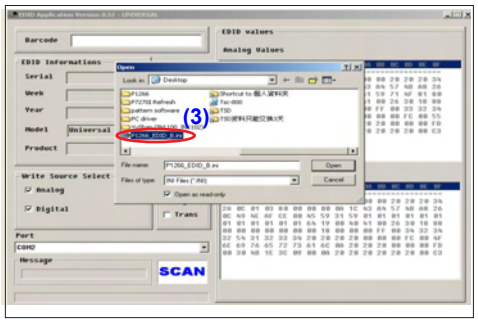
   (1) "Please change the cable to Analog" will be shown on the screen.

   (2) Please press "Ok" button.

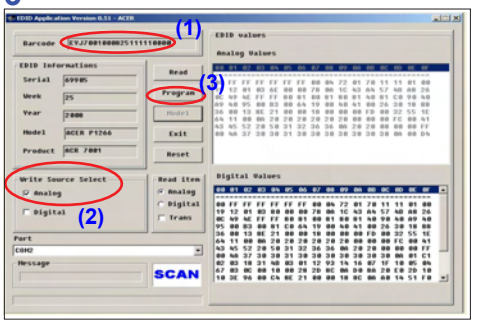
1

2

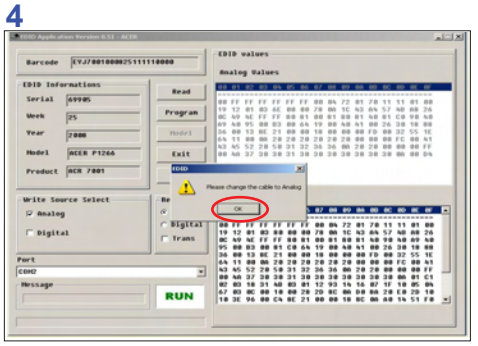




3



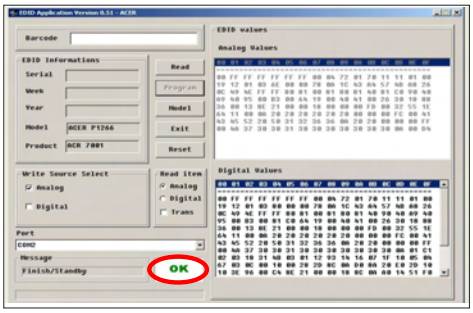
4



5. Finish

(1) "OK" will be shown on the screen.

5

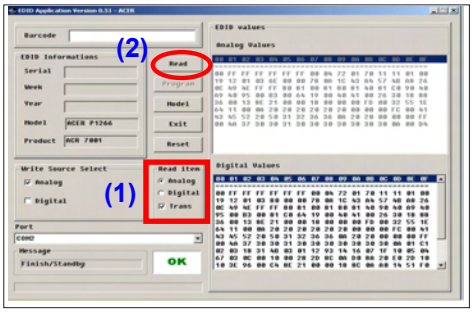


6. Read EDID information

(1) In the Read item,select "Analog" and "Trans".

(2) Please press "Read" button.

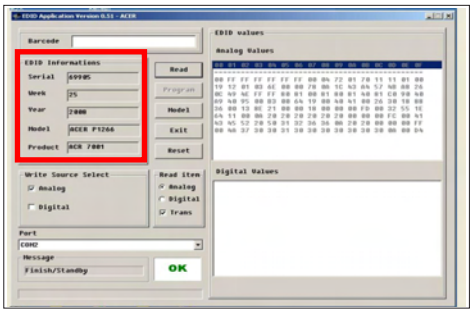
6



7. Read EDID information

(1) EDID Informations will show the result.

7



6-5 Setup Procedure (HDMI)

1. Connect all ports

   (1) Connect P1 of Fixture with COM Port of PC/Laptop by RS232 Cable.

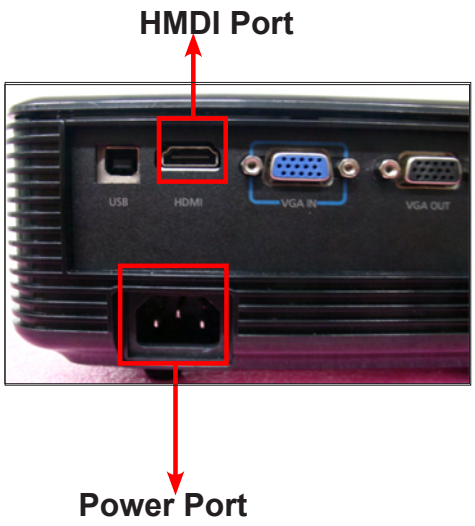
   (2) Connect P2 of Fixture with P3 by DVI Cable.

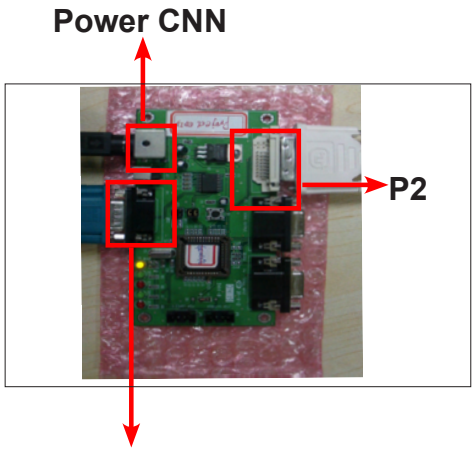
   (3) Plug P4 to HDMI Port of the Projector.

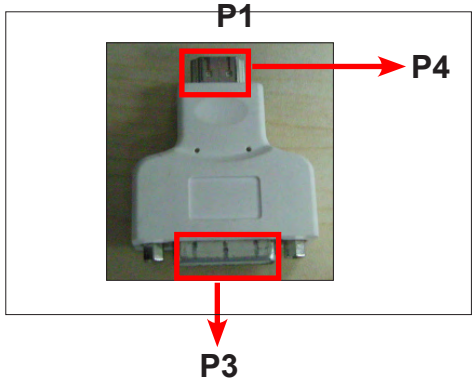
   (4) Plug Power Adapter to Power CNN.

   (5) Plug Power Cord to P12660 unit.

   Note: Confirm JP3 is Close status.







2. Process

(1) Check the COM port is "COM 2"

(Select the COM port which you are using).

(2) Click the "Model" button.

(3) Choose the source file "ACER_P1266 EDID-B.ini" and then open it.

3. Process

(1) Key in the serial number into the barcode blank space.

(2) In "Write Source Select" item,select "Digital".

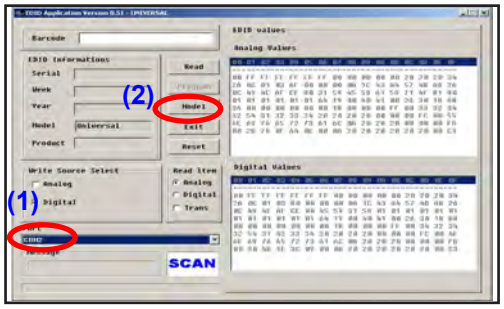
(3) Click "Program" button.

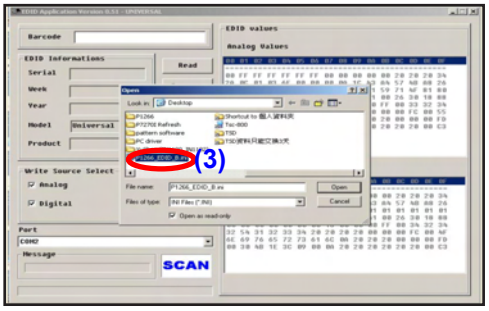
4. Process

(1) "Please change the cable to Digital" will be shown on the screen.

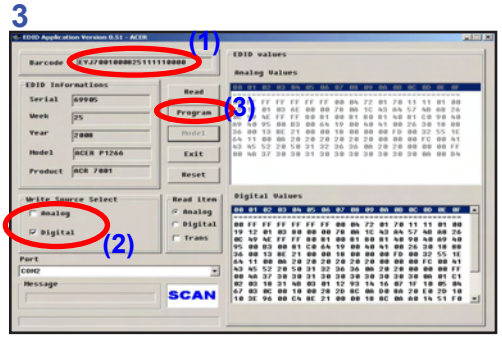
(2) Please press "Ok" button.

2

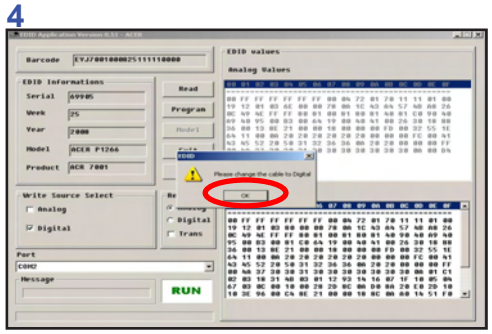




3



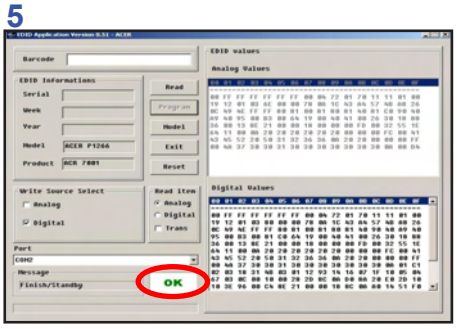
4



5. Finish

(1) "OK" will be shown on the screen.

5

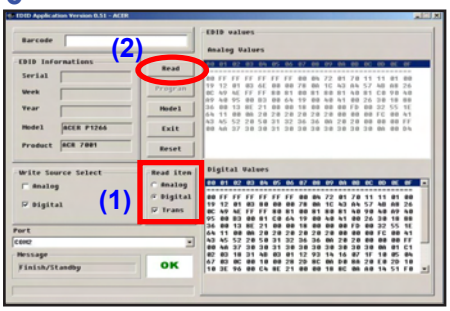


6. Read EDID information

(1) In the Read item, select "Digital" and "Trans".

(2) Please press "Read" button.

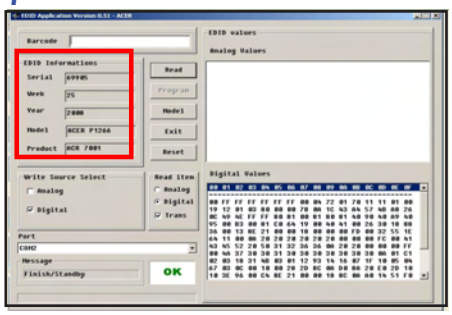
6



7. Read EDID information

(1) EDID Informations will show the result.

7



6-6 Default Language Reset

(1) Hold on “Down” button then plug in the Power Cord.

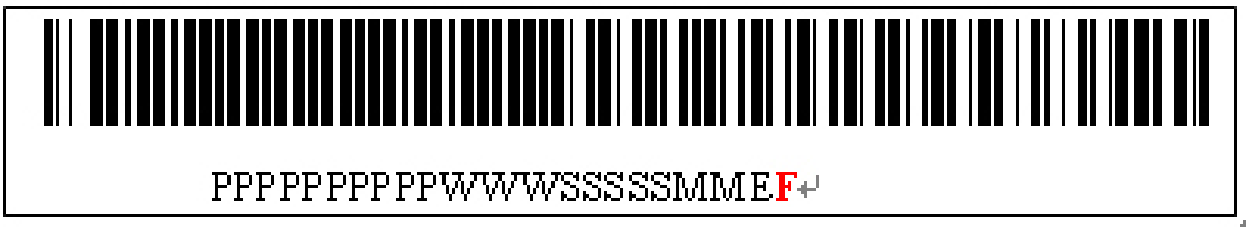
Note: At this moment, Power LED turns blue while Temp LED flashes in red for about 4s, then release the “Down” button.

(2) After that, please check the LED status and judge the actions as the following table:

LED Status	Result
Power(blue)+TEMP(red)+LAMP(red)	OK
Power(blue)+TEMP(red)	Fail

Note: if fail, please do the actions as bellow steps item (1)-(2)

S/N General rule:



Use the last 1 digit code (as red word) for language information

Language code(F)	Default Language
1	English
2	Thailand
3	Japan
4	TC
5	SC
6	Russian
7	Germany
8	Hungarian

Appendix B

I. Serial Number System Definition

Serial Number Format for Projector (take P1166 for example)

EYJ6901001 820 00000 59 0 1

① ② ③ ④ ⑤ ⑥

① : **EYJ6901001 = Part Number**

② : **820 = Date Code (ex:2008 = 8, the twentieth week of the year = 20)**

③ : **00000 = Serial Numbers**

④ : **59 = Manufacturing Code**

⑤ : **0 = Version Code**

⑥ : **1 = Auto-Language Code**

II. PCBA Code Definition

PCBA Code for Projector

A	B	XXX	XXXXXXXXX	CC	XXX	EEEE
1	2	3	4	5	6	7

1 : ID

2 : Vendor Code

3 : Firmware Version

4 : P/N

5 : MB version

6 : Date Code

7 : S/N
